Connect IP Camera for Eas Remote Monitoring

Whether wired IPC or wireless IPC, the difficult problem of monitoring networking can be solved by one device.

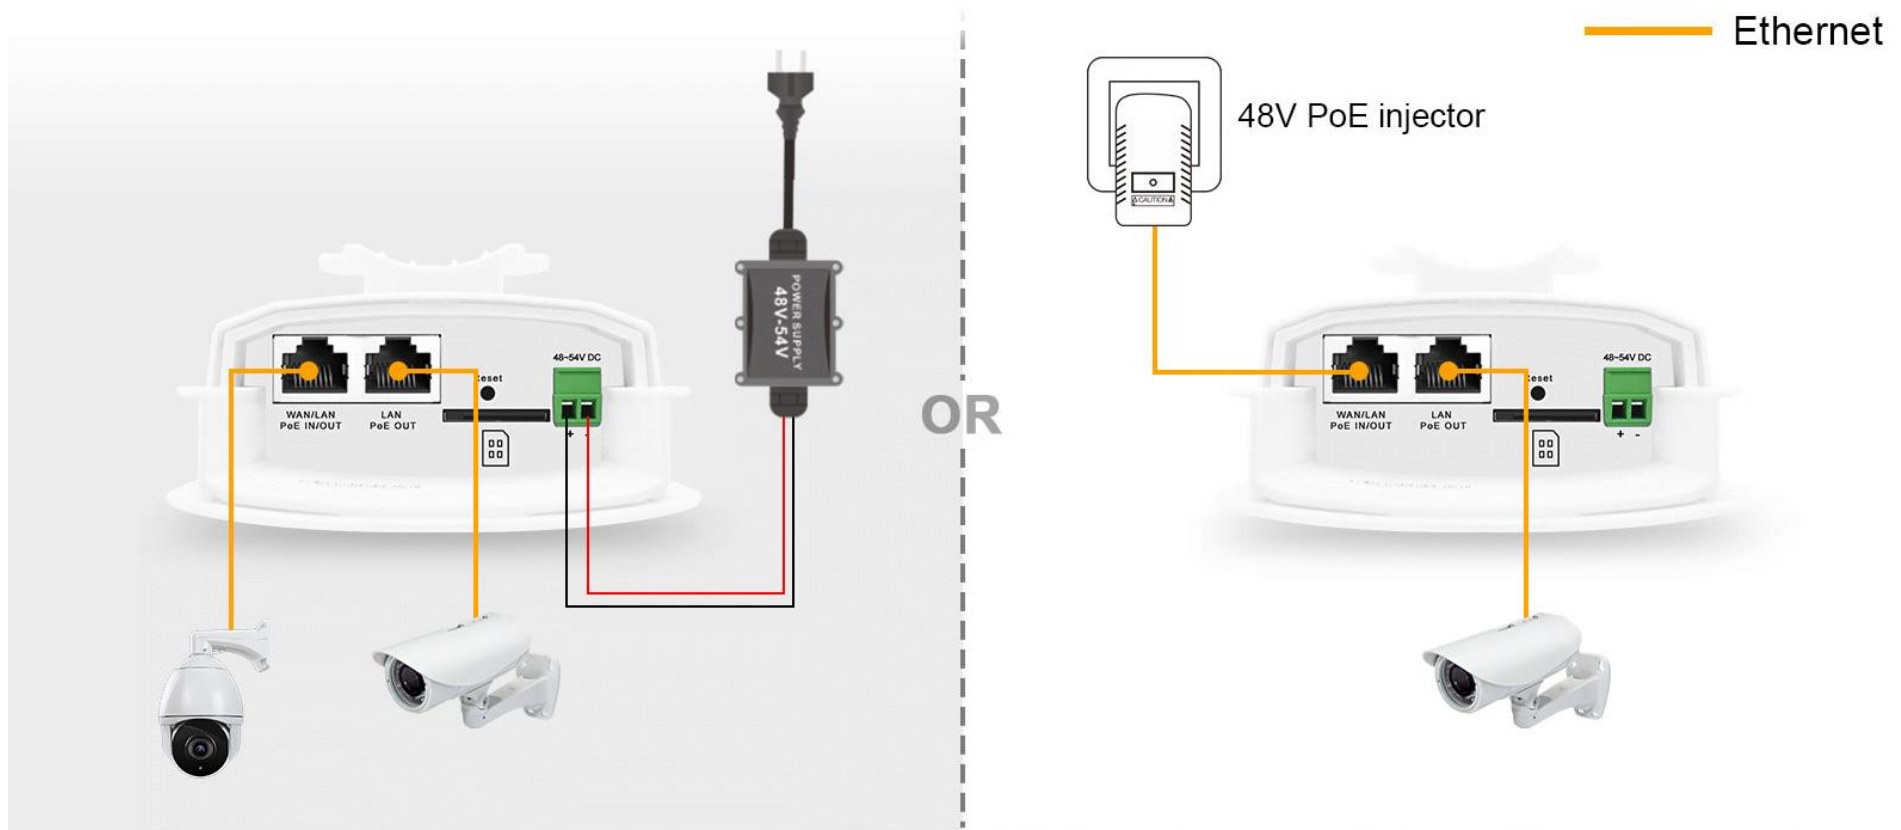

Dual Antenna 300M Wireless Stronger Wi-Fi Signal

Using 2x2 MIMO omni antennas, optimized by scientific algorithms, effectively reduce interference and enhance wireless coverage.

Flexible Power Options for Different Power Scenarios

Rich Network and Security Features

Open VPN

DDNS

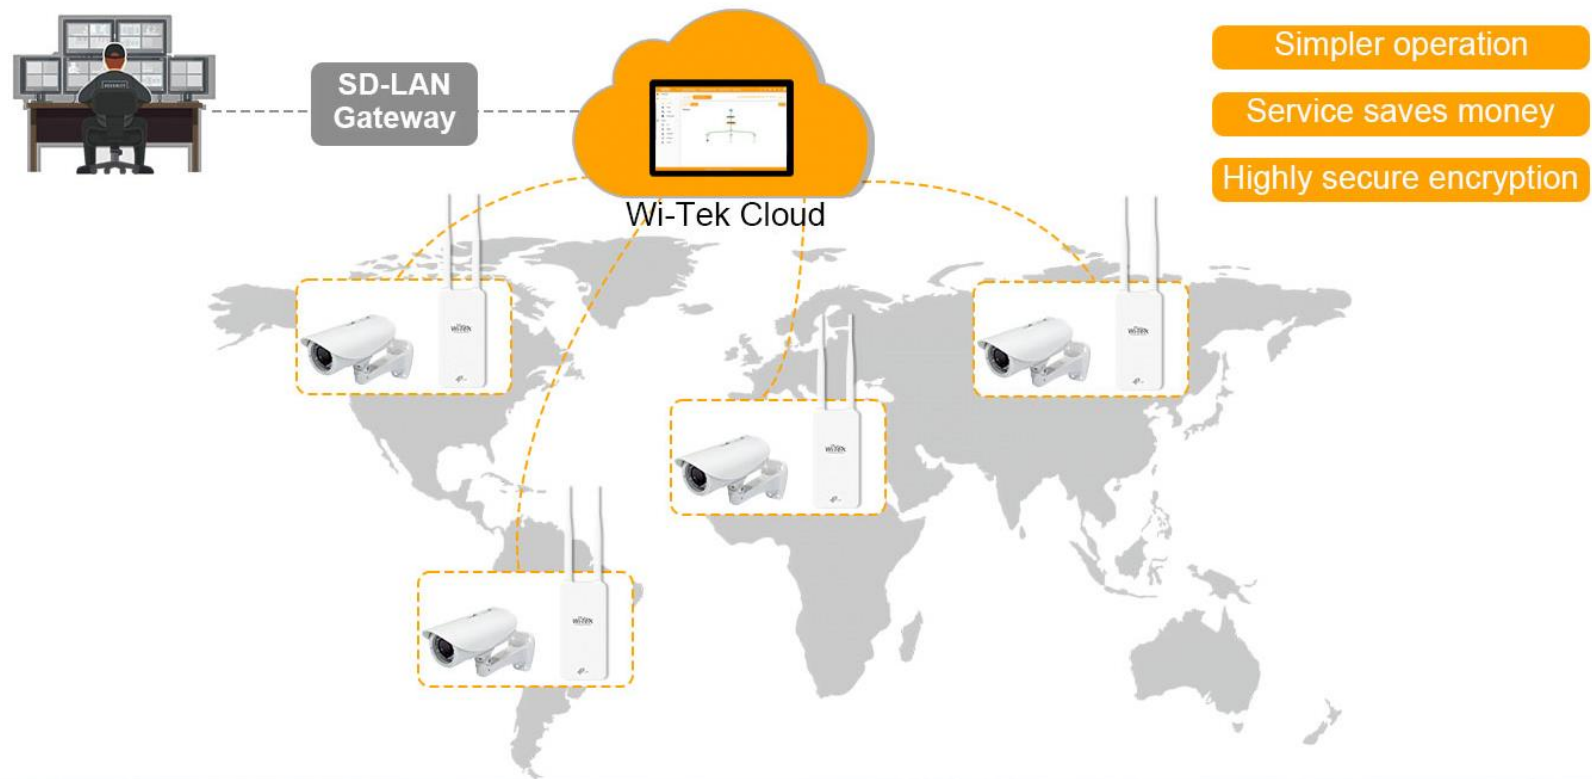

APN

Firewall

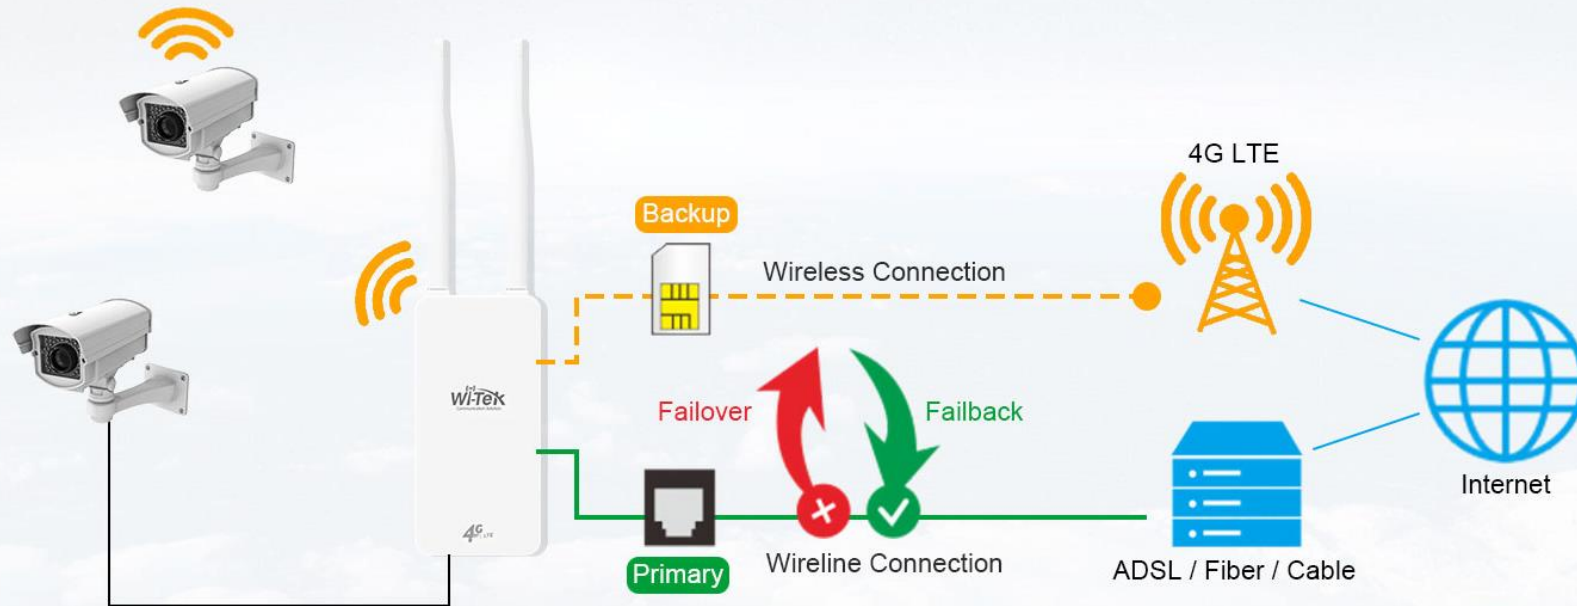

Unique SD-LAN Intelligent Networking

Easily manage remote IP cameras

Failover and Network Backup

Failover delivers redundant connectivity to ensure uptime, whether your primary connection is wired or cellular. If the primary connection fails, the backup kicks in.

Multiple Application Scenarios

Farmhouse

Warehouse

Scenic Spot

Parking Lot
