1.Installation

1.1 Installation Process

Step 1: Unpack the Unit

This package contains the following items:

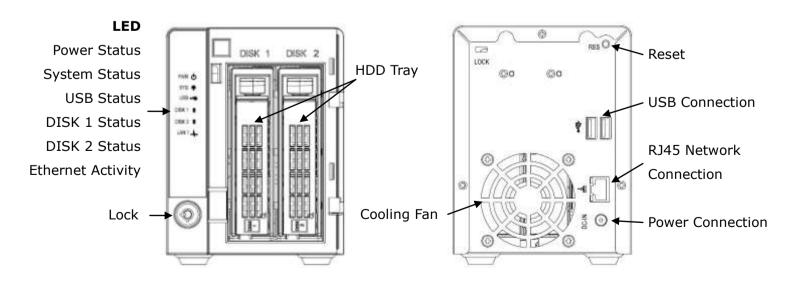

- The unit
- Quick Start Guide
- Screws for disk drives
- Key
- Power cord
- Warranty card
- 19V DC power transformer
- CD with Install Wizard, Backup, Live View, Playback, Verification
 Tool and Offline Tool application, user manual, and quick start guide

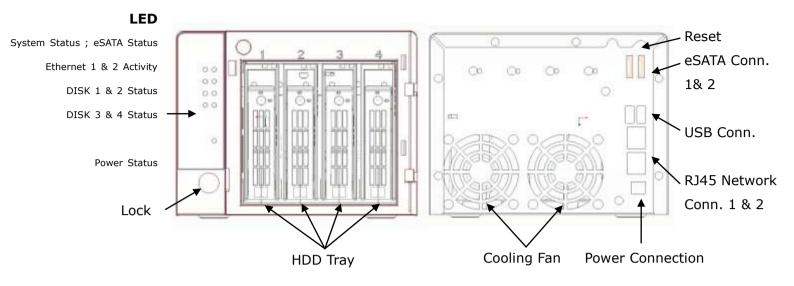

The electronic components within the unit can be damaged by Electrostatic Discharge (ESD). Please take precautions at all times when handling the unit or its sub-assemblies.

To configure the unit, you must install the software onto a desktop/ laptop running Windows XP-SP3 32bit, Windows 7 32/64bit.

2 bay unit front/rear view

4 bay unit front/rear view

Step 2: Install Hard Drives

Refer to compatibility list and install HDDs. For optimal performance consideration, install disks with the same model and storage capacity. The available RAID level depends on the amount of disks installed.

- 1. Open the lid on the front of the unit enclosure.
- 2. Pull a HDD tray from the enclosure. See the front view figure.
- 3. Carefully lock the disks into the HDD tray with screws. 4 screws for each disk. Put the HDD tray back once you finished.

Step 3: Connect to the Network

- 1. Attach one end of the network cable to the RJ45 network connection. See the rear view figure.
- 2. Attach the other end of the network cable to your Ethernet hub or switch.

If there are multiple networks at your facility, note the network to which you connect the unit. You will need this information during the setup process. Please also enable the DHCP function within the network, as the unit will retrieve an IP address through DHCP by default.

Step 4: Connect the Power

1. Attach the power cord from the power source to the power adapter.

- 2. Connect the power adapter to the back of the unit enclosure. See the rear view figure.
- 3. On the front of the unit, press the power button. See the front view figure.

It takes about a minute for the unit to fully power up. Once it is powered up:

- The System Status LED turns blue. See the front view figure.
- The buzzer beeps one time.

Step 5: Install the Software

- 1. Insert the CD into your CDROM.
- 2. Double-click **Setup.exe** to begin installation.
- 3. Follow the instruction of **Setup.exe**, and click the **Finish** button to close the installer.

Step 6: Set up the Unit

The software **Installation Wizard** performs the setup procedures on the unit. After the procedure, you can begin using it.

- 1. Go to Start > NUUO NVRmini 2 > NUUO Install Wizard.
- 2. This program will show the default language setting and initiation mode.
- 3. Choose your preferred language and initiation mode, and then click the button.

• Express Mode: you don't need to set up the network settings, Date/Time

and RAID level.

• Advanced Mode: configure all settings manually: network, license, camera, Date/Time, upgrade notification, and RAID level

"Add license" function is supported in v1.0.0.20 and later version.

4. The **Installation Wizard** program starts searching for all the units on the internet currently. Choose one of them, and then click the **button**.

2.Settings

After setting up the unit, log in to the system by entering its IP address in the browser (Internet Explorer 8 and later). When connecting, choose your language, enter the username and password, and then begin using this system.

There are five main functions of this unit: settings, live view, playback, help, and logout. They will be shown on the top of the page. Current firmware version and free storage capacity are shown above the function list.

2.1 Camera Setup

2.1.1 Add Cameras by Camera Search

The function enables user to automatically search and add cameras in the same network. There are two search mechanisms, one is UPnP, another is camera search tool. Before searching UPnP cameras, make sure that the cameras possess UPnP function. Refer to **camera support list**.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click IP Camera/ Camera Settings.
- 3. Click the Camera Search tab.

4. Click the **Search** button.

5. The system will list all the currently available cameras. The inserted cameras are shown in blue. Click the 🔹 icon to add a camera into your camera list.

- **Camera name**: The name of the camera.
- Address: The IP address.
- **Port**: The transmission port.
- Administrator Name: Login username.
- **Password**: Login password.
- Video Channel: Select the number of analog cameras supported by one video server or select the number of IP cameras possessing multiple

lens/channels.

- **Protocol**: Data transmission protocol.
- Vendor: Camera vendor name.
- Model: Camera model name.

Q

To have better compatibility between camera and system, please make sure the privilege of camera credential is admin-level.

5. Click the **Save** button.

- **Save**: Save the information of this camera.
- **Reset**: Return to the latest saved settings of the selected camera.
- **Clear**: Set all the settings to default value.
- Auto Detection: After inserting IP address, port, username, and password, click this button to automatically detect other camera information, including Channel, Protocol, Vendor, and Model.

2.1.3 Modify Camera Information

- 1. Open Internet Explorer and log in to the unit.
- 2. Click IP Camera / Camera Settings.
- 3. Click the **Camera Settings** tab.
- 4. Click the camera which you want to modify.
- 5. Modify the information of this camera.
- 6. Click the **Save** button.
- 7. Use the same method to replace a camera if needed.

2.1.4 Modify Camera Parameters

- 1. Open Internet Explorer and log in to the unit.
- 2. Click IP Camera / Camera Parameters.
- 3. Click the **Camera Parameter** tab.
- 4. Click the camera which you want to modify on the camera list.
- 5. Modify the information of this camera.
- 6. Click the **Save** button.

- **Camera Name**: The name of the camera.
- Lens Type: There are two types of lens currently, ImmerVision and

Vivotek (FE8171V). You are not allowed to select type so far, type depends on camera model.

- Lens: Enable or disable lens function.
- **Camera Position**: Select the position of the camera.

If users enable the lens while lens is not installed correctly or not even installed, a warning message will pop up as a notification if users are trying to operate lens on liveview page.

2.1.6 Set up 2nd Stream

Stream profile is designed for mobile client and lower fps live stream display. Without stream profile integration, users cannot watch live video on mobile client nor select lower fps stream on live view. Further, for performance consideration, we fix the resolution and frame rate for each brand/series. Refer to **camera support list**.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click IP Camera / Camera Parameters.
- 3. Click the **2nd Stream Settings** tab.

amera Parameter	Lens Settings 2nd St	ream Settings	_	_

Recording Status	Schedule Recording – Stopped	

- Frame Rate: The frame rate of this camera.
- **Bit Rate**: The transmission bit rate of this camera.
- Estimated Remaining Recording Time: Estimated remaining recording time is dividing the current free capacity by dynamic total bit rate.

If your total bit rate becomes red, it means that the loading of the system is too heavy.

2.2 Recording & Event Setup

2.2.1 Recording Mode Setup

- 1. Open Internet Explorer and log in to the unit.
- 2. Click Recording & Event / Recording settings.
- 3. Click the **Recording Mode** tab.
- 4. If selecting **Always Record**, the chosen cameras will begin to record immediately.

Recording Mode Rec	ording Schedule								
C Recording Mode									
	No Recording								
Recording Mode	Record by Schedule								
	Always Record All IZ Camera 1 IZ Camera 2 Camera 3 Camera 4								
Automatic Recycle	[V]Enable								
Keep Video	23 Keep Video 30 Days								

- **No Recording**: Turn off the recording.
- **Record by Schedule**: Recording by schedule.

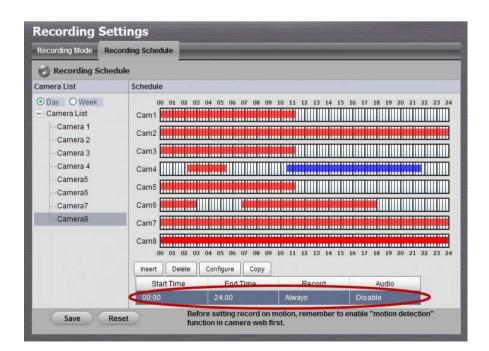

- Always Record: Permanently turn on the chosen cameras.
- Automatic Recycle: Check the **Enable** option to recycle disk space automatically when the disk space is full.
- Keep Video: Set a period during which the recorded video clips will be kept intact. (max: 365)

The privilege of automatically recycle is higher than keep video if you select both.

2.2.2 Recording Schedule / Event Setup

Instead of **Always Record**, you can begin the recording by setting the **Recording Schedule**.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click Recording & Event / Recording Settings.
- 3. Click the **Recording Schedule** tab.
- 4. Check the **Day** or **Week** mode.
 - Day: Schedule the recording to turn the recorder on and off at the same time every day according to your setting.
 - Week: Schedule the recording for each day of the week differently.
- 5. Click the schedule of the camera which needs to be modified.
- 6. Click the column at the bottom of the page.

- **Insert**: Insert new schedules.
- **Delete**: Delete the selected schedule.
- **Configure**: Modify the schedule and recording mode settings.
- **Copy**: Copy current **Day Schedule** to other channel(s); copy current **Week Schedule** to other day(s) of a week or to other channel(s).

 The default setting of the camera's recording schedule is from 00:00 to 24:00. If you want to modify the time slot, click the **Configure** button to modify the default settings first.

Schedule Configurati	00:00 00:00 5 Sec. (Max.: 180) 5 Sec. (Max.: 180)	Mode Always Record Record on Event	
Enable Audio			Ok Cancel

8. Choose the recording mode.

Schedule Configur	ation	
Start Time: End Time: Pre-record Post-record Audio	00:00 00:00 5 Sec. (Max.: 180) 5 Sec. (Max.: 180)	Mode Always Record Record on Event Motion on Camera 1 Motion on Camera 2 Motion on Camera 3 Motion on Camera 4 Digital Input Expand All Digital Inputs Camera 2 Camera 3 Camera 4
		Ok Cancel

- Always Record: Always record.
- **Record on Event**: Record when events triggered. The event can be triggered by *Motion* or *Digital input*.

When setting the event Motion, please first ensure that the motion detection function of the camera has been enabled.

9. If you want to add another new schedule, click the **Insert** button to add a new one.

Recording Mode Rec	ording Schedule	_		_	
😸 Recording Schedule				Insert	
Camera List					
Camera List Camera List Camera 1 Camera 2 Camera 3 Camera 4 Camera 4 Camera6 Camera7 Camera8	Cam4				
	Start Time	End Time	Record	Audio	D.
	00.00	11.15	Always	Disable	
	13:00	16:00	Alway6	Disable	

10. Click the **Save** button.

When changing the motion detection settings of a camera, make sure to disconnect

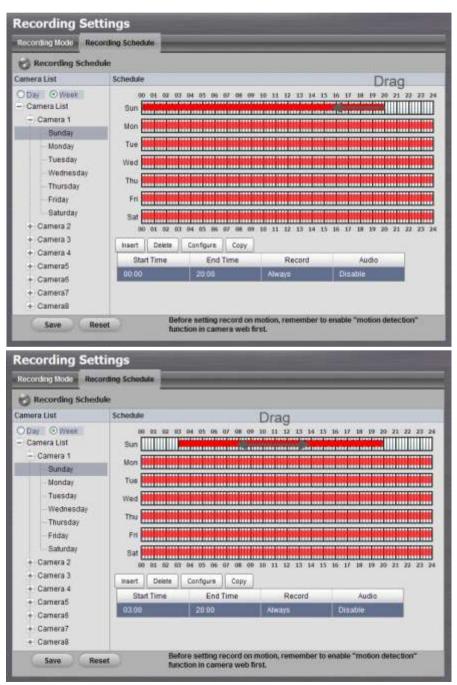

your unit and that camera first. Once you have finished, re-connecting them will update the settings in your unit.

0

When setting an event, **Motion** or **Digital input** can be triggered from other cameras. This means that if the system detects motion or digital input from other cameras or I/O Box, the camera will begin recording.

There is another way to set the schedule. If you want to change the recording time length, drag the end of the time bar from 24:00 back to the length you wish, and then drag the beginning of the time bar to the point at which you would like it to commence recording. (You may also click the **Insert** button to add new schedules.)

2.2.3 Camera Events and Responding Actions Setup

- 1. Open Internet Explorer and log in to the unit.
- 2. Click Recording & Event / Event & Action Management.
- 3. Choose the camera, and then select one of the events. The event list depends on camera its own ability.

Event & Action	
Event & Action	
Camera List	Event & Action
Configure	Add Del Configure
+ Location 1 - Location 2 Connection lost Motion from Came Input#0 + Location 3 + Location 4 + System	Action Options
Users have to sign in or	com Camera, please enable the motion detection function on the camera's web interface first. I mobile clients to start push notification service. If the user passworld is changed, please sign is to start the service again.

- **Connect lost**: When a connection between the camera and this unit is lost, the system will trigger an action.
- Motion from Camera: When video motion is detected, the camera triggers an action.
- **Input**: Any external input can trigger an action.

When setting the event **Motion from Camera**, make sure to set up the camera's motion detection function first. Besides, event log will be recorded only if event is selected on this page.

4. Click the **Configure** button to enable the event and select the active period.

Event Configuration X
Enable Event Active Period Always Active

- **Reset**: Return to the latest saved settings of the contact list.
- **Save**: Save this time modification of the contact list.
- 4. Insert the name of a new contact.
- 5. Insert the Email address of this new contact.
- 6. Click the **Add Contactor** button.
- 7. Click the **Save** button to save this modification of the contact list.

2.3 RAID & File Settings

2.3.1 Create a RAID Volume

In this system, the term RAID volume refers to one or more disk drives working together as a RAID logical drive. You must create a RAID volume before starting to record.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click RAID & File System / RAID Management.
- 3. Click the **Create** tab.

Create RAID		
RAD Level	ORAID 0 ⊙RAID 1 RAID 5 RAID 10	
Assign Desk(v)	Disk 1 Disk 2 33 co	

- 4. Choose the RAID level you prefer for your disk array.
- 5. Check boxes of disks and click the >> button to assign disk drives for this volume.
- 6. Click the **Create** button.
- A confirmation dialog pops up. Check the Yes, I want to create volume with those disk(s) box, and click the Yes, create it button.

Use those dis	ik(s):		
Disk Name	Model	Capacity	1
Disk 1	ST31000525SV	931 GB	
Disk 2	ST31000525SV	931 GB	

8. Creating RAID volume takes a while, depending on the size of disks and the RAID level you choose. You can start recording during RAID creation.

RAID Status Modify	Defete Format	
👩 RAID Status		
Ust	Status	
- Volumes	RAID Name	VOLUME1
- VOLUME1	RAID Level	RAD1
Disk 1	RAID Status	Functional
Disk 2	Total Capacity	931.51 GB (953868 MB)
0.002	Free Capacity	N/A
	Used Capacity	NIA
	Usage	
	Update Time	2011/4/26 PM 123737
	Total Devices	2
	Active Devices.	2
	Failed Devices	0
	Spark Devices	0
	Formal Progress	
	Recovery Progress	hard and a second se

The RAID Volume will be functional on another unit if **all** disks of this volume are moved to the unit.

After setting RAID level, you are not allowed to change neither the RAID level nor the number of disks containing in this volume.

To reduce the possibility of having problems to access public folder via My Network Places, before creating new disk volume or modifying volume, please delete the invalid volume if any.

If you choose Express Mode when using the **Installation Wizard**, the disk(s) will be set to RAID 1 (2 bay) or RAID 5 (4 bay) automatically unless the number of disks is not enough for this RAID level.

2.3.2 View RAID Volume Status

RAID status refers to the disk drives on your unit and how they are arranged into a RAID volume.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click RAID & File System / RAID Management.
- 3. Click the **RAID Status** tab to view the status of your RAID Volume.

RAID Status	Cruille Delete Format		
RAID Status			
List	Status		
- Volumes - VOLUME1 Disk 1 - VOLUME2 Disk 2	RAID Name RAID Level RAID Status Total Capacity Free Capacity Used Capacity Used Capacity Usage	RAID0 Functional 233 GB 216 GB 13 GB	6%
	Total Devices		

- **RAID Name**: Name of your RAID, automatically assigned when it was created.
- **RAID Level**: RAID 0, 1, 5, or 10, specified when it was created.
- **RAID Status**: *Functional* is normal. *Critical* means there are some

problems on RAID volume, but the recording status is normal. **Offline** means that no volume is found, so recording is stopped and you cannot access your data either. **File system error** means that RAID volume is existed but unmounted, so recording is stopped and you cannot access your data either.

- **Capacity**: Total, free, used data capacity of the RAID volume.
- **Update Time**: The time of volume created/updated.
- **Devices**: Total number of disks and the number of active, failed, spare disks.
- Format Progress: The status of RAID format
- **Recovery Progress**: The status of RAID recovery

2.3.3 View Disk Drive Information

- 1. Open Internet Explorer and log in to the unit.
- 2. Click RAID & File System / RAID Management.
- 3. Click the **RAID Status** tab.
- 4. Click on a disk directly to view the information.

RAID Status 10001 Cr	Delete Format	
🕑 RAID Status

	Senal No.	GEC534RJOHK9ME
	Smart Support	Yes
	Smart Enable	Enable
	RAID Status	Active

2.3.4 Modify RAID Volume

This function is designed for replacing a broken hard drive with a new one, instead of modifying RAID level.

In the condition of critical RAID status, it's a warning to show that one of disks of this RAID volume may be damaged. Even though it's no impact on the recording function, you'd better to replace a new disk to make sure the volume with data protection mechanism.

This function is not applied to RAID 0, since there is no data protection mechanism by

In case of any unexpected damage, we recommend users to unplug running HDD by this method, which can be viewed as security hard drive remove.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click RAID & File System / RAID Management.
- 3. Click the **Modify** tab.

Are you sure y	ou want to del	ete this volume?		
Volume	VOLUME1		1	
	Disk Name	Model	Capacity	
Assigned Disks	Disk 1	ST31000525SV	931 GB	
	Disk 2	ST31000525SV	931 GB	

7. System will restart automatically after RAID volume is deleted

When you delete a RAID Volume, all the folders in the RAID volume and all the data saved in the folders will be deleted. Backup any important data before deleting a RAID Volume.

2.3.6 Format

Neither pressing reset button nor loading default setting, the data of RAID volume won't be deleted, which implies that format is the only way to clean the RAID information from disks.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click RAID & File System / RAID Management.
- 3. Click the **Format** tab.

RAID	List		-		
	Volume	RAID Level	RAID Capacity	RAID Status	Details
۲	VOLUME1	RAIDO	1863.02 GB	Functional	Details

- 4. Click the option button beside the RAID Volume you want to format.
- 5. Click the **Format** button.
- 6. A confirmation dialog pops up. Check the **Yes, I want to format this volume** box, and click the **Yes, format it** button.

Are you sure y	ou want to for	mat this volume?	•	
/olume	VOLUME1		1	
	Disk Name	Model	Capacity	
Assigned Disks	Disk 1	ST31000525SV	931 GB	
	Disk 2	ST31000525SV	931 GB	

7. System will restart automatically after volume format is complete.

2.3.7 Modify the "My Network Places" Protocol Settings

There are another two ways to access the recorded data in the unit: through Workgroup or through FTP.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click RAID & File System / Protocol Control.
- 3. Click the **Windows** tab.
- 4. Check and enter the unit's information.
- 5. Click the **OK** button.

Andows FTP: Stering		
🖒 Windows Settings		
Services	Enable O Disable	
Server Name	NVRmini 2	
Server Description	Room 1	
Domain or Workgroup Name	WORKGROUP	

- Services: Enable to let users access this unit through Windows Explorer. (default: disable)
- Server Name: The name of this unit, which is set in the Setup tab of the Network Setup function.
- Server Description: The name which will be displayed in Windows Explorer.
- **Domain or Workgroup Name**: The name of this unit's workgroup.

2.3.8 Modify the FTP Protocol Settings

- 1. Open Internet Explorer and log in to the unit.
- 2. Click RAID & File System / Protocol Control.
- 3. Click the **FTP Sharing** tab.
- 4. Check and enter the settings of this unit.
- 5. Click the **OK** button.

Protocol Control			
Windows FTP Sharing			
of FTP Settings			
Bervices	⊙ Ena	able O Disable	
Command Port	21		
Passive Pots	1024	~ 65535	
OK Cancel	1. erenne		

- **Services**: Whether users can access this unit through FTP or not.
- **Command Port**: The port for commands between a server and a client.

• **Passive Ports**: The data transmission port of passive mode.

2.4 Auto Backup

This feature enables you to automatically backup the recorded video of the previous date to FTP site. There are two steps to enable the function, one is **Set up Backup Schedule**, another is **Set up Backup Server**.

2.4.1 Set up Backup Schedule

- 1. Open Internet Explorer and log in to the unit.
- 2. Click RAID & File System / Auto Backup Management.
- 3. Click the **Backup Schedule** tab.
- 4. Set up backup schedule, select the backup channels, and check the **Enable** option to enable **Auto Backup**.

Backup Schedule	ip Servee
🕝 Backup Schedule	
Auto Backup	
Daily Backup Time	00 00
Video Starl Time	07 00
Video End Time	18 00
Camera	select: al / none V Camera 1 V Camera 2 V Camera 3 V Camera 4
🖒 Current Event Setti	ngs
Unable to access FTF	Enable
Bacrup Unfinisher	1 Enable

- Auto Backup: Check the Enable option to enable this function.
- **Daily Backup Time**: The daily scheduled time to start backup process.
- Video Start Time: The start time of recorded video of the previous date.
- Video End Time: The end time of recorded video of the previous date.
- **Camera**: Select the channel(s) to backup.
- 5. Current Event Settings shows the condition of the events of auto backup

 enable or disable. Follow the steps of System Events and Responding
 Actions Setup to configure the event & action.

The system backups recorded video files one by one. If the connection between the unit and FTP server is normal, but some problems of FTP causes the system unable to

write files on FTP, the system would try each file three times before starting to backup the next file. If the connection is lost, the system would wait for the connection, so no file would be skipped.

2.4.2 Set up Backup Server

- 1. Open Internet Explorer and log in to the unit.
- 2. Click RAID & File System / Auto Backup Management.
- 3. Click the **Backup Server** tab.
- 4. Set up the FTP server and create a folder for backup files. The folder format is "FolderName", "FolderName/SubFolderName", and so on.

For example: AutoBackup/NVR

Seekup Sehedule Backu	p Server	
🖉 Backup Server		
FTP Site	nuuo dhsalias com	
FTP #ort	21	
Username	FAE	
Password		
Backup to Remote Folder	AutoBackup/NVR	
Save Reset		TestFTP

5. After setting up all the information, click the **Test FTP** button and the system will create a folder to FTP. Check it after testing. In this case, the route of the tested file will be:

ftp://nuuo.dnsalias.com/AutoBackup/NVR/NVRmini2_ComputerNa
me

6. Click the **Save** button.

Q

Make sure the FTP account with privileges of administrator who is able to upload, rewrite, delete files, and create new folder. Besides, make sure the FTP server has enough space for auto backup.

To avoid the failure of auto backup, please check the normality of FTP server regularly (e.g., enough space for video, system conditions.)

2.5 Network Setup

2.5.1 View Network Status

- 1. Open Internet Explorer and log in to the unit.
- 2. Click Network Setup / Network Setup.
- 3. Click the **Information** tab to view the unit's network information.

information	Setup 00%	NS Setup	UPoP Port Forwarding	
	and a second	a source	Contra Post Contractioner	
Commo	n Information	8		
	Server	Name	NVRmini 2

C Ethern	IP AI	ddress	tion 192.168.3.202	
1 Ethern	IP AI	ddress		
	IP AI	ddress et Mask	192 168 3.202	
	IP Ar Subre at Gateway IP Ar	ddress et Mask ddress	192 168 3 202 255 255 252 0	

2.5.2 Network Settings

- 1. Open Internet Explorer and log in to the unit.
- 2. Click Network Setup / Network Setup.
- 3. Click the **Setup** tab to set up the network settings of your unit.

dormation Setup DDNS Setur	UPnP Port Forwarding	
Common Setting		
Berver Name	NVRmini 2	
😴 Ethernet Adapter 1 Setting		
Internet Protocol	Obtain an IP address automatical	ly 🔿 Specify an IP address
IP Address	182.168.3.204	
Subnet Mask	155 255 252.0	
Default Gateway IP Address	192.165.1.1	
Primary DNS		

• Server Name: Name your unit.

Because of the internal data modifications required, it takes a few seconds to change the name of your unit. Log in again after configuration activated.

- **Internet Protocol**: Choose to obtain an IP address from external DHCP server automatically, or configure the IP address manually.
- **IP Address**: IP address of this unit.
- **Subnet Mask**: Subnet mask address.
- **Default Gateway IP Address**: Gateway IP address.
- **Primary DNS**: Primary DNS (Domain Name System) address.
- **Secondary DNS**: Secondary DNS address.

There are two Giga LANs in 4bay unit. We recommend using them under the scenario of two subnets, one is for cameras/devices, and the other is for remote access. If you deploy two LANs on the same subnet, it's likely to make parts of camera disconnected as either one of LAN is disconnected.

4. Click the **DDNS Setup** tab to enable Dynamic Domain Name Server function, allowing you to connect unit with dynamic IP address.

nformation Setup	DDNS Setup UPnP Port Forwarding	
🖉 Dynamic DRS Se	ting

Hostname		
Update Period	15 minutes	

2.5.3 Auto Port-Forwarding

This function is designed for saving time in port configuration on router if users want to access the unit (in LAN) from WAN. Once enabling UPnP Service on router, users can do port-forwarding for setting page (default: 80), liveview (default: 5150), playback (default: 5160), and CMS (default: 5170) automatically.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click Network Setup / Network Setup.
- 3. Click the UPnP Port Forwarding tab.
- 4. Click the **Search** button, and the searched routers will be listed.

nottentro	Setup DDNS Setup	UPnP Port Forwarding		
) UPBP R	outer Search			
Search	Search com	plete		
No	Dev	Ace Name	IP Address	
1	D-Link DIR-300		192.168.8.1	

5. Select the searched router, and all UPnP ports configured on this router will show under the **UPnP Port Forwarding List**.

ormation	Setup	DDNS Setup	UPnP Port	Forwarding		_	
UPnP Ro	uter Sea	rch					
Search		Search comple	de l				
No.		Device	Name		IP Addres	s -	
1	D-Link Di	R-308			192,168.8.1		+
) UPnP Po		rding List Virt	ual IP	Virtu	al Port		
Physic				51673			
Physic 51673		192.168.8	62	01010			
		192.168.8 192.168.8	100	47500			
51673			223		- 1		

6. After selecting one of searched routers, click the 🔹 icon to set up port-forwarding to this router automatically. You will find ports of setting, liveview, playback and CMS are listed.

formation Se	tup DDNS Setup	UPnP Port Forw	arding		
J UPnP Route	r Search				
Search	Search comple	ete			
No.	Device	- Name		IP Address	
1 04	Jink DIR-300		192	168.8.1	+
51673	192,168,8	62 5	1673		
Physical Po		tual IP	Virtual Port		
47500	192.168.8		7500	-	
47500	192.168.8	223 4	7500		
1234	192.168.9	55 1	234		
80	192.168.3	50 8	0		
5150	192.168.3	50 5	150		
5160	192.168.3	50 5	160		
5170	192.168.3	40 6	170		

For security reason, the privilege of UPnP port-forwarding is LOWER than port-forwarding configured on router. Therefore, if the ports have been used on router, we are unable to know before finding out access failure.

UPnP port-forwarding is for temporarily use only. Most of UPnP router will clean up all UPnP ports after router reboots. Furthermore, for some routers, if the port you want to add has already been used for other devices in the same way (UPnP port forwarding), this "enable" action will cover over the settings.

2.5.4 Network Service Setup

1. Open Internet Explorer and log in to the unit.

- 2. Click Network Setup / Network Service.
- 3. Click the **Web Service** tab
- 4. Set up a port for this unit and click the **Save** button.

5. Click the Live View & Playback Service tab.

eb-Service Live	View & I	Playback Service	CMS Service		
Live Streamin	g Serve	r			
	Port	5150

• Live Streaming Server

- > Port: Live streaming transmission port.
- Maximum Connections: Maximum connections from remote access. (Max: 64)
- Playback Server
 - > Port: Playback transmission port.
 - Maximum Users: The number of users who can access playback functions at the same time. (Max: 8)
 - Log Access: Check to record playback access information on NVR Log page, including access time, playback video channels, and time frame.
- Allowed/ Blocked List

- Allowed List: Only IP addresses from the allowed list are allowed to log in.
- Blocked List: IP addresses from the blocked list will be unable to log in.

When setting Maximum Connections in Live Streaming Server settings, 1 connection means that one user connects to one camera. If the maximum connections value is set to 16, and each user connects to 4 cameras, the allowed connections per user will become 4, rather than 16.

2.5.5 CMS Service Setup

- 1. Open Internet Explorer and log in to the unit.
- 2. Click Network Setup / Network Service.
- 3. Click the **CMS Service** tab.

Web Service Live View &	Playback Service	CMS Service	
CMS Server			
CMS Server	Enable		
Port	\$170		
Maximum Connections	8		

- **CMS Server**: Check the **Enable** option to enable CMS service.
- **Port**: the port number through which the CMS connects to this unit.
- Maximum Connections: The maximum number of allowed CMS connections.

2.6 Management

2.6.1 View the List of Users

- 1. Open Internet Explorer and login the unit.
- 2. Click Management/ User Management.
- 3. Click the **Create New Users** tab.
- 4. The list will be displayed on the bottom of the page.

NOC	Name	Group	Live View	PTZ	10	E-Map	Playback	Backup Data
1	a123456789	power user	1.2.3,4	0	0	0	1.2.3.4	0

rsays	and landsome	Backup Data Delete Data		

- 4. Insert the username of this new user.
- 5. Insert the password of this new user.
- 6. Choose the group of this user.
 - **Power user**: Power user can do all the settings except the **Network Settings**, **RAID Settings**, and **Management function**.
 - **User**: User just can change his/her password and do the live view and playback functions.
 - **Guest user**: User can do live view and playback function only.
- 7. Select the live view cameras which this user can access.
- 8. Select the playback channels which this user can access.
- 9. Check whether this user can backup or delete recorded data.
- 10. Click the **Create New User** button to finish it.

The Administrator will be the only user who can use all of the functions. There is a default administrator account in the system, and you cannot create neither another "Administrator" account, nor another username named "admin".

2.6.3 Modify User Information

- 1. Open Internet Explorer and log in to the unit.
- 2. Click Management / User Management.
- 3. Click the **Modify Users** tab.
- 4. Click one of the users in the User List on the bottom of this page.

Retype Password		

- 4. Choose the user.
- 5. Enter a new password.
- 6. Enter this new password again.
- 7. Click the **OK** button.

2.6.5 Delete Users

Except for the administrator, you can delete any users with the following steps.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click Management / User Management.
- 3. Click the **Modify Users** tab.
- 4. Click the Delete icon of the user you want to delete.

io.	Name	Group	Live View	PTZ	10	E-Map	Playback	Backup Data	_

3	aau	guestuser	1.2.3.4	x	×.	х		х	0

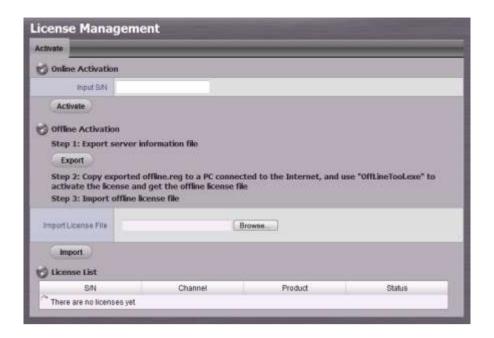

5. In the confirmation box, click the **OK** button.

2.6.6 Online License Activation

There are two types of license currently, camera license for 2/8ch-device and POS license for all series. With the camera license upgrade, the 2ch-device will possess up to 4ch capacity, while 8ch-device will possess up to 16ch capacity. With the POS license upgrade, users can use **POS function**.

There are two ways to activate license, online and offline.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click Management / License Management.

- 3. Select **Online** as the Activation Type, input serial number, and click the **Activate** button.
- 4. The license will be updated in License List if activated successfully. System will reboot automatically.

) License List			
SIN	Channel	Product	Status
X000-X00X-X00X-X00X	2	NUUO NVRmini 2	Activated

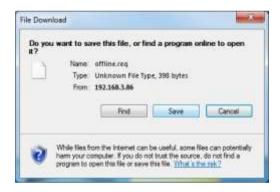

2.6.7 Offline License Activation

If the device is set up in Intranet (Local LAN) without Internet connection, there is another way to activate license.

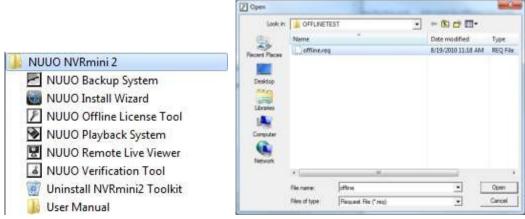

- 1. Open Internet Explorer and log in to the unit.
- 2. Click Management / License Management.

011/03/30(Wed) 14:15:43 011/03/30(Wed) 14:09:56 011/03/30(Wed) 14:09:56	info info	web service start

There are four kinds of event which will be listed on this page.

- Hardware Log: The log information of the operations to your unit, such as reboot or shut down.
- **NVR Log**: The log information of the NVR system, such as system, recording, user access information, POS and auto backup.
- **NVR Event Log**: The log information of the "Event & Action Management", such as motion detection or camera connection lost.
- **Backup and Export Log**: The log information of the track of video data exported and backup.

The NVR Event Log will be recorded only if event is selected on **Event & Action Management** page. As for user access information, please go to **Network Service** to check **Log Access** box to enable this function.

2.6.9 Save Unit Configuration

Save configuration can let you save the settings of this unit. These settings can be applied to other units, which will let you set other units more easily.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click Management / Save / Load Configuration.
- 3. Click the **Save Configuration** tab.

- 4. Check the box of **E-Map Settings** or **POS Settings** if you want to keep the configuration.
- 5. Click the **OK** button.
- 6. The configuration file will be generated into the chosen folder.

2.6.10 Load Unit Configuration / Default Settings

Load configuration can let you apply another unit's settings to the current unit; Load Default Settings will revert all of the unit's settings back to the default factory settings.

- 1. Click Management / Save / Load Configuration.
- 2. Click the Load Configuration tab.

Save Configuration	Load Configuration
Click the Load Dutton to	ttings load default factory settings. Uncheck the following box if you want to keep the network settings
Optional	V Network Settings
Load	2
🖒 Load Configurat	ion load the configuration of Camera Settings, Recording Settings, Event & Action Settings, E-Mail Settings
Click the Load Dution to	

3. Follow the direction to **Load Default Settings** or **Load Configuration**. For the former, uncheck the box of **Network Settings** to keep the IP address; for the latter, check the box of **E-Map Settings** or **POS Settings** if you want to restore the configuration.

- 4. Click the **Load** button.
- 5. A confirmation dialog pops up. Click the **OK** button to begin to load the settings into your unit.

If there is POS database existed in the unit, loading configuration with different POS application config is likely to make the original POS data unsearchable.

If the saved configuration is without E-map or POS settings, selecting loading configuration with E-map/POS settings will lead you get the default. The original E-map/POS settings (if any) are covered and untraceable.

User account and privilege will be kept even if loading default settings, while camera settings, recording schedule, event & action settings, Email setting and server settings won't be. **RAID information** will always be kept whether loading default settings or loading configuration.

User account won't be exported as saving configuration, which implies the user list of push notification won't be saved as well.

2.7 System

2.7.1 View System Information

- 1. Open Internet Explorer and log in to the unit.
- 2. Click System / System Information.

System Information	
🕑 Information	
Operating System	Unux
NVR Version	01.06.0004.0105

CPU	Feroceon 88FR131 rev 1 (v5l)
CPU Loading	12.94%
MAC Address	50 E5 49 59 AB 12
CPU Temperature	39.000 °C
System Fan Speed	3590 RPM
Locate	Locate

The system information includes the following items.

- **Operating System:** Embedded Linux
- NVR Version: NVR system version
- **Device Pack Version**: Camera package version
- **CPU**: CPU model number
- **CPU Loading**: The approx. CPU loading of this unit
- MAC Address: MAC address of this unit
- CPU Temperature
- System Fan Speed
- Locate: Click to trigger the buzzer to let you know where the unit is

2.7.2 Smart Fan Control

- 1. Open Internet Explorer and log in to the unit.
- 2. Click System / System Settings.
- 3. Click the **Fan Control** tab.

Fan Control	Blatzer	APC UPS	
🕤 Fan Coi	ntrol		
	CPUT	Temperature	32.000 °C
	System	Fan Speed	2652 RPM
		Setting	⊙Enable O Disable

- 4. Check the **Enable** or **Disable** option.
- 5. Click the **OK** button.

2.7.3 Buzzer Configuration

There is a buzzer in the unit. When the unit finishes booting or when a problem is detected, this buzzer will sound. This buzzer is enabled by default. You can disable/enable this buzzer with the following steps. (We recommend that this buzzer should be enabled.)

- 1. Open Internet Explorer and log in to the unit.
- 2. Click System / Settings.
- 3. Click the **Buzzer** tab.

- 4. Check the **Enable** or **Disable** option.
- 5. Click the **OK** button.

2.7.4 UPS Setup

This feature enables you to tell your unit how long to run on APC Uninterruptable Power Supply (UPS) battery power and when to shut down, after power failure.

- 1. Attach the APC UPS to one of the unit's USB ports.
- 2. Open Internet Explorer and log in to the unit.
- 3. Click System / Settings.
- 4. Click the **APU UPS** tab.
- 5. Check one of the options:

Fan Control Bu	APC UPS	-

- **Disable**: Run until the UPS battery is depleted
- System shutdown as power of the UPS remains _____ %: Run until the UPS battery remains this percentage.
- System shutdown as power of the UPS remains _____ min.: Run until the UPS battery remains the certain period of time.
- 6. Fill in the specific value if you choose the last two options.
- 7. Click the **OK** button.

2.7.5 Upgrade the System

- 1. Open Internet Explorer and log in to the unit.
- 2. Click **System / Upgrade**.
- 3. Click the **Firmware Upgrade** tab.

Firmware Upgrade	Upgrade Notification			
🕑 Upgrade				
	Current NVR. Version	01.06.0004.0105		
	Ournerst Device Pack version	02.04 0000 0010		
	Select file		Browse	

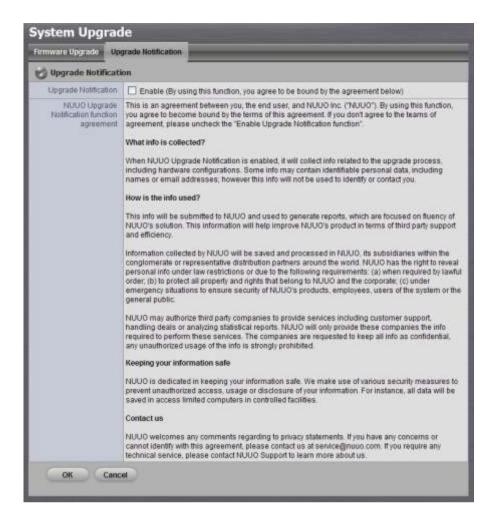

- 4. Browse the FW for upgrading and click the **OK** button.
- 5. A confirmation dialog pops up. Click the **OK** button to start upgrade process.
- 6. After upgrade, the system will restart. You need to re-access the unit again after this.

2.7.6 Upgrade Notification

Enable this function to allow us to notify you automatically when there are firmware updates (Recommended). This will help keep your system up to date. The updater will also collect info from your system that will be used for future system improvements.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click System / Upgrade.
- 3. Click the **Upgrade Notification** tab.

- 4. Check the option if you agree to be bound by the agreement.
- 5. Click the **OK** button.

2.7.7 System Date and Time Setup

- 1. Open Internet Explorer and log in to the unit.
- 2. Click System / Date/Time.

🖒 Time Zone										
Time Zone	(Gl	VIT) Coordin	ated U	Iniversal Tir	ne, Gre	enwich Mear	Time	Dublin, Lis	bon, London	e

- 3. Choose the time zone.
- 4. Configure the year, month, day and time manually, or enable NTP server to synchronize time automatically. When NTP server enabled, the date/time settings will be grayed out.
- 5. Check the **Adjust clock for daylight saving changes** option and select the time change of daylight saving time in your location. Choose the start time and end time of recurrence.
- 6. Click the **OK** button to restart system to activate the changes.

Clicking the **Update Now** button will save the settings automatically before restarting system.

2.7.8 Restart the Unit

- 1. Open Internet Explorer and log in to the unit.
- 2. Click System / Reboot/Shut down.

Reboot/Shut o	lown
Options	
🕑 Options List	
Options	Reboot C Shut down
OK Car	ncel

- 3. Check the **Reboot** option.
- 4. Click the **OK** button.
- 5. A confirmation dialog pops up. Click the **OK** button to reboot the unit.

The restart procedure runs automatically. When the unit is fully online:

- The System Status LED turns blue.
- The buzzer beeps one time (if the buzzer is enabled).

During system restart, none of your files will be accessible from your desktops/laptops.

2.7.9 Shut down the Unit

The only time you need to shut down the unit is to replace the disk drive cooling fan or the power supply. During and after the shutdown, none of your files will be accessible from your desktops/laptops. There are two ways to shut down the unit.

• Shut down by Software

- 1. Open Internet Explorer and log in to the unit.
- 2. Click System / Reboot / Shut down.

- 3. Check the **Shut down** option.
- 4. Click the **OK** button.
- 5. A confirmation dialog pops up. Click the **OK** button to shut down the unit.

• Direct Shutdown

- 1. Open the lid of the unit.
- 2. Press and hold the power button for 2 seconds and release your hands when the buzzer is beeping once.
- 3. System will begin the shut down process, which takes about 30 seconds to few minutes depends on number of recording channels and other factors.

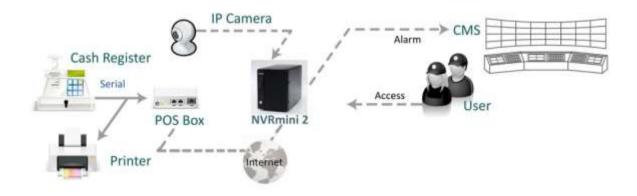

If the system is crashed and stocked, you can press the power button and hold it for 10 seconds to force to cut off the power directly. We don't recommend to do it if the system work properly.

3.POS

3.1 Introduction

3.1.1 System Introduction

NUUO POS, a Point of Sales Systems based on NUUO NVR/DVR/NVDR/NVRmini/NVRmini 2, provides financial transaction's surveillance solution in one central system. The architecture is as below; POS transaction data flows to NVRmini/NVRmini 2 by Ethernet. Each Cash Register with an external receipt printer is connected by DB9 cable. The transaction information delivered in R232 format can be converted to Ethernet through SCB-C31A POS data capture converter.

Definition of Terms

Terms		Definition
POS	Original	Original data from POS. Usually with a lot of
Data		symbols and no line feed.
POS		Filtered result by user-defined tag-filter.
Transa	ction	

Product Specification

	NUUO POS Box SCB-C31A
Input	RS232
Output	Ethernet
DC In	DC +10V to +15V
Power consumption	500 mA
Operating Temperature	-20 to 65°C

Operating Humidity	0-90 % Non-Condensing
Baud Rate	110 bps to 230.4 kbps
Data Bits	5, 6, 7 or 8
Stop Bits	1, 1.5 or 2
Parity	None, Even, Odd, Mark, Space
Flow Control	None, RTX/CTS, XON/XOFF, DTR/DSR

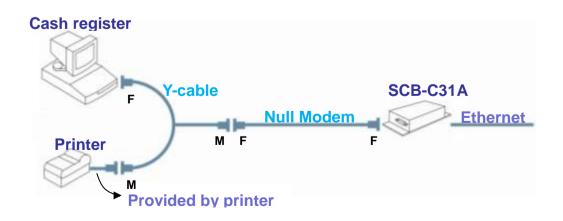

3.1.2 Hardware Installation – SCB-C31A

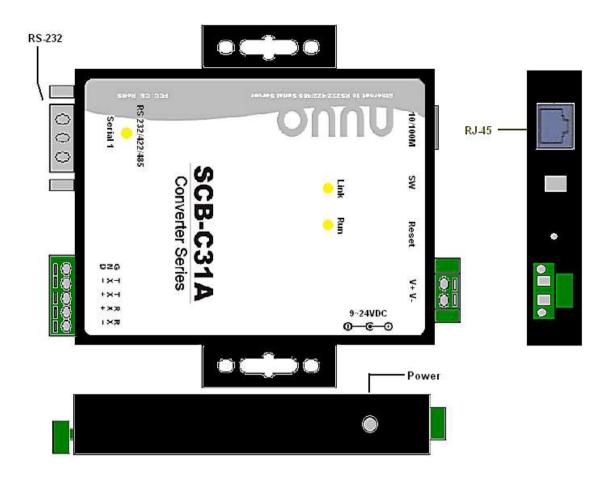

To connect Cash Register, Printer, and SCB-C31A POS data capture converter together, please follow below steps:

- Step 1: Please refer the user manual to setup Cash Register and printer.
- Step 2: Using a "Y-shape" DB-9 cable, one DB-9 female connect to POS system and one DB-9 male connect to the receipt printer Y-shape (provided by Printer vendor).
- Step 3: Using another DB-9 female connect to SCB-C31A POS Data Capture R232/Ethernet converter with Null modem.

There are two kinds of serial cable: Straight pass-through and Null-Modem. The connection between SCB-C31 POS Data capture box and Y-cable must be null modem (in package).

- Step 4: Check the system switch of the SCB-C31A is switched to OFF-OFF position.
- Step 5: Connect SCB-C31A with power source.
- Step 6: Connect SCB-C31A with internet port by RJ45 LAN cable.

The LED Indicators: LINK LED: Ethernet cable connection and data active. RUN LED: System is ready (Blinking). Serial 1: Transiting/Receiving Indicator.

3.1.3 Software Installation – SCB-C31A

Step 1: Use IE-browser to setup SCB-C31A, the default IP address is **192.168.1.1**

File	ver Page - Microsoft I Edit Yww Favorites	Tools Help	terre selle te
Addre	a) 192.168.1.1		v 🔊 😡

Step 2: Setup IP address and password in **Server** page, and click the **Save** button.

Each time you switch the page of the web, please click Save at first. If you leave this page without saving, all changes will be ignored.

Step 3: Setup Password if needed. Password is only using to activate a security feature on the serial server. Once a password is entered it will be required to access the menu and make change of configuration when access.

Please write down the Serial number and MAC address, these two parameters are necessary when user forget your password.

	Note: If you loave this y	ups without saving, all ch	enges will be ignore
Server	Server name.	DOB-CILA	
rial Port	Serial number:	1000	
	Version & Date:	1.3.30 & 01000	
perstion	Password	01	
	DHCP	Eastar	18
	IP address	10011A01120	
	Netmask	203 234 2012	
	Gateway	100110111	
	MAC address:	TOTAL DATION COMPANY	
	Link status:	000%4 Digital	
	Hardware ID	FT-001.42	

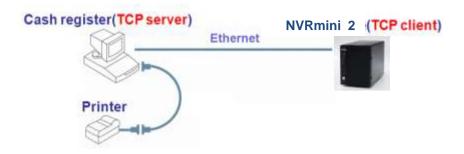

- Step 4: Setup according to your POS or Cash Register. Usually all devices are default setting, you can reserve your time to pass this step.
- Step 5: Please **restart/reset** the box after changing configurations to active setup.

To reset the unit manually apply power, insert a small plastic tool, and press lightly depressing reset located between the switch. Hold for 3 seconds and release. The Link and Run light will go out and turn back on. The SCB-C31A will revert to the last setting.

Every time you change the configuration of SCB-C31, please check above setting, especially maximum connection and Remote IP address to avoid connection fail.

3.1.4 Connection via TCP Client

If the cash register possess network, please install system according to following diagram and purchase a POS license to activate this function.

3.2 Software Setup

3.2.1 Activate POS License

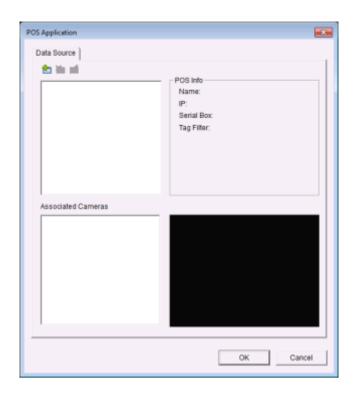

If you are not the SCB-C31 user, you need to activate POS license before starting the following settings, please refer to **License Activation** for details.

3.2.2 NVR POS Setting

- 1. Open Internet Explorer and log in to the unit.
- 2. Click POS & I/O / POS Settings.

NR POS Setting					
) POS Settings					
POS Name	Address	Serial Box	Tag Filter		
No records found.					
Settings					

3. Click the **Settings** tab to set POS application.

- **Data Source**: List of all the data sources.
 - Insert: Click to insert POS and do the POS settings. See <u>Insert</u>.
 <u>POS Setting</u> for details.
 - Delete: Click to remove the selected POS from the list. See <u>Delete</u> <u>POS Device</u> for details.
 - Configure: Click to configure the selected POS and modify the POS settings. See <u>Configure POS Setting</u> for details.
- **POS info**: The setting information of the selected POS on this window.
 - > Name: Name of the POS data source.
 - > IP: IP of the POS data source.
 - Serial Box: The serial box data source used.
 - Tag Filter: Tag type to filter the data from POS. See <u>Tag Filter</u> for details.

• Associated Cameras: List of all the associated cameras of the selected POS.

4. Click the OK button to finalize the modification.

3.2.3 Insert POS Setting

- 1. Click 🛍 **Insert** button to open the **POS Setting** window.
- Set up basic data source, including Name, Model, IP address, and Port. There are three types of models.

- **SCB-C31**: The device possesses one POS license, and should be equipped with the cash register not working as TCP server.
- **SCB-C31A**: The difference from SCB-C31 is not possessing one POS license, so user should activate POS license.
- **TCP Client**: Cash register possesses with network, so no need to have SCB-C31A as a converter. POS license is needed.
- 3. After setting, click **Test Connection** to test POS device connection.

Data Source Se	goith		Miscellaneous

- 4. Set up Miscellaneous options, including **Record POS Transaction** and **Display on Video Preview**.
 - **Record POS Transaction**: Select this checkbox to record POS transaction data. Users are allowed to search the POS data.
 - **Display on Video Preview**: Select this checkbox to display POS transaction overlay on associated camera live video. Two types of transaction data display time:
 - > Name: Name of the POS data source.
 - Always: Keep transaction data on video until receiving next transaction date.
 - Last for <u>seconds</u>: Each transaction data only lasts on video for seconds after receiving the last data of transaction.

- 5. Select **Tag Filter**. See **<u>Tag Filter</u>** for details.
- 6. Select the camera of **Associated Cameras** to display POS transaction data overlay on live video.
- 7. Set up display area for each camera video in **Display Region Definition**.
- **Default**: The default display area is in the upper left corner of video image.
- User Define: Enable User Define, and define display area by dragging rectangle
- 8. Click the \mathbf{OK} button to save.

3.2.4 Delete POS Device

- 1. Choose POS device.
- 2. Click 🛎 **Delete** button to remove this POS device from the system.

3.2.5 Configure POS Setting

- 1. Choose POS device.
- 2. Click domination 2. Click domination of the POS Setting window.
- 3. Refer to **Insert POS Setting** to modify configuration.

3.3 Tag Filter

The original transaction data from POS system is hard to read. Users can define filters to make the POS strings meaningful. The system also provides a simple default tag filter to filter out same common EPSON commands, users can base on this default tag filter to edit their customized filters.

3.3.1 Add New Tag Filter

- 1. Click **Insert** button or choose a device and click **Configure** button to open the **POS Setting** window.
- 2. Click **New** to open tag filter window.
- **General**: Name of Tag Filter and Connect button.
- **Original Data**: Original transaction data from POS device.
- Filtered Data: Filtered data after definition.
- Filter Functions: Tool used for defining filter type.
- Filter List: List of all filters.
- **Data Tools**: Clear/import/export buttons to clear/import/export the

original and filtered data.

• Filter Tools: Upper/down buttons to arrange the priority of each filter; remove button to remove the filter from list.

- 5. Select a POS device(s) from the POS list.
- 6. Set up Start Time and End Time in **Data Time Period** section.
- 7. Enter the keyword you want to search.
- 8. Click the **Search** button, the results will be shown in Transaction table.
- 9. Select an item from Transaction table, the transaction detail will be shown in the table of lower right corner, and the recorded video of associated camera will be shown in the upper right corner.
- 10. Select the checkbox of **Search within result**, and enter a keyword, you can search the data within the results.

3.5.2 Search POS Transaction Data through Playback System

- 1. Startup > NUUO NVRmini 2 > Playback System.
- 2. Click the **Open Record** button to open **Data Time Search Dialog** window.
- 3. Click the **Remote Server Site** icon on the top of the window to select the server users want to access.
- Follow the step 4 through 10 of <u>Search POS Transaction Data by</u> <u>Playback</u> to search the data.

3.6 Playback Video with POS Data

Enable POS overlay in **Setting** window to view recorded video with POS transaction data (Refer to **POS Display Font**). If the option is enabled, the system will auto display transaction data when playing recorded video. There are two modes to select video period.

3.6.1 Select Period by POS Search

- 1. Refer to **POS Transaction Data Search**.
- 2. Select the transaction data from the result list, and click **OK**.

4. Click **OK** to playback videos.

3.6.2 Select Period by Data & Time through Playback

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Playback** button.
- 3. Click the **Open Record** button to open **Data Time Search Dialog** window.
- Highlight the video clip you want to review by left-clicking and dragging the time period. You may also utilize the Start Time and End Time in **Date Time Period** section after choosing cameras.
- 5. Click **OK** to playback videos.

3.6.3 Select Period by Data & Time through Playback System

- 1. Startup > NUUO NVRmini 2 > Playback System.
- 2. Click the Open Record button to open Data Time Search Dialog

window.

- 3. Click the **Remote Server Site** \oint icon on the top of the window to select the server users want to access.
- Highlight the video clip you want to review by left-clicking and dragging the time period. You may also utilize the Start Time and End Time in **Date Time Period** section after choosing cameras.
- 5. Click **OK** to playback videos.

3.7 Backup Video with POS Data

There are three ways to backup video with POS transaction data.

3.7.1 Backup through Internet Explorer

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Open Record** button to select data.
- 3. Click the **Backup** button.

- 4. Check the **Backup POS Transaction** option.
- 5. Set the Start Time and End Time you want to backup.

- 6. Select the cameras you want to backup.
- 7. Select the directory you want to save the backup data.
- 8. Click the **Backup** button.
- 9. The system will then begin backup process automatically.

3.7.2 Backup through Playback System

- 1. Startup > NUUO NVRmini 2 > Playback System.
- 2. Click the **Open Record** button to select data.
- 3. Click the **Backup** button.
- 4. Check the **Backup POS Transaction** option.
- 5. Set the Start Time and End Time you want to backup.
- 6. Select the cameras you want to backup.
- 7. Select the directory you want to save the backup data.
- 8. Click the **Backup** button.

3.7.3 Backup through Backup System

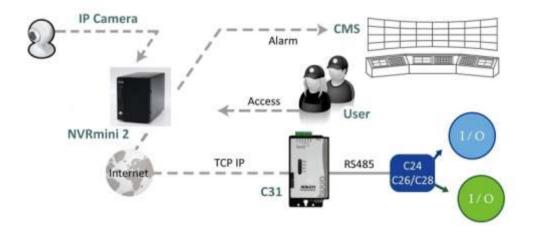

Please refer to step 1 to 14 of the content of **<u>Backup and Delete Records</u>**, and check the **Backup POS Transaction** option.

4.I/O

4.1 Introduction

4.1.1 System Introduction

NUUO provides remote I/O solution for NVRmini/NVRmini 2 by connecting SCB-C31 with NUUO I/O Box SCB-C24/26/28. Refer to the below architecture, I/O device is connected directly with I/O Box, and input/output signal delivered in RS485 format are converted to Ethernet through SCB-C31. NVRmini/NVRmini 2 can use the signals to do more sophisticated setup, such as starting recording when input triggered, triggering output as an event happened, and much more.

4.1.2 HW Installation

SCB-C24/26/28 must work with SCB-C31 (Ethernet-RS485 converter). Further, **the C31 Box cannot be used for POS and converter at the same time, and one C31 Box can be paired with one NVR unit only.** Please follow the steps below to configure the devices.

Step 1: Check the system switch of SCB-C31 is switched to OFF-OFF position.

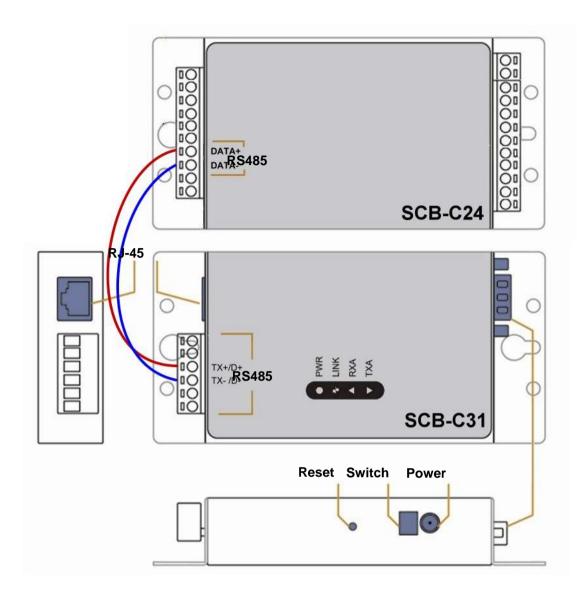

Step 2: Connect SCB-C31 with power source.

Step 3: Connect SCB-C31 with internet by RJ45 LAN cable.

Step 4: Connect I/O Box with power source.

Step 5: Connect SCB-C31 and I/O Box with cable, positive connection

(TX+/D+ and DATA+) and negative connection (TX-/D- and DATA-). Take SCB-C31 with I/O Box SCB-C24 for example as below.

Multiple I/O Boxes can be connected to a single SCB-C31. However, series connection of I/O boxes is forbidden. Furthermore, the default ID for each I/O Box is the same. Please follow the direction to setup I/O Box one by one.

4.1.3 Software Installation – SCB-C31

Step 1: Open Internet Explorer to setup SCB-C31. The default IP address is 192.168.1.1.

and a state of the	
Toole Reb	
	🛩 🛃 Go
	Toon One

Step 2: Setup IP address and port. 1. **Static IP Address** 2. **Server Listening Port**: The default port is 4000, which is not the port for setting page, but for signal transmission.

Serial Settings	
Data Baud Rate	9600 -
Data Bits	ł .
Data Paritiy	None -
Stop Bits	1 .
Flow Control	None -
Network Settings	
	V Enable DHCP
Static IP Address	192.168.1.1
Static Subnet Mask	255.255.255.0
Static Default Gateway	192,168.1.3
Static DNS Server	168.95.1.1
Connection Type	TCP +
Transmit Timer	30
Server/Client	Server -
Server:	
Server Listening Port	4000
Client:	
Destination IP	192.168.1.2
Destination Port	4000
	Enable Reboot
	Apply Reset
	Firmware Upgrade

Step 3: Click the **Apply** button to activate configuration.

4.1.4 Software Installation – SCB-C24/26/28

The default ID of I/O Box is identical. To avoid the conflict between Boxes, please connect only one Box with SCB-C31 and execute the setup application to change the ID from the default value (1).

1. Execute IOConfig.exe, type in the IP address and port of SCB-C31, and click the **Scan** button.

canning	options	- Scanning results -		
Configura	tion via C31	Address / ID	Name	Baud rate
P:	192.168.8.95			
Port:	6666			

IOConfig.exe starts scanning the ID from 0 to 255, and it may take around a minute to finish scan.

2. When the I/O Box is discovered, click on the item and change the ID from the **New Address** field. Click the **Update device** button to activate the settings.

canning	options			
Configura	tion via C31	Address / ID	Name	Baud rate
P;	192.168.8.95	1	C26	9600
Port.	6666			

3. Scan again to make sure the configuration is validated. In this case, we changed the ID to 10, so we can modify the number of "Starting address" to 10 to save the searching time.

Scanning	options	Scanning results		
Configura	ation via C31	Address / ID	Name	Baud rate
IP:	192.168.8.95	10	C26	9600
Port	6686			
Starting address:	12	Tiew siddress	10	Update device
	Scan	Plays Imigd rate:	9600 -	

4. Refer to the **<u>HW Installation</u>** section to connect other I/O Box and repeat the steps 1 through 3 above to configure more I/O Boxes.

4.2 Software Setup

4.2.1 Add I/O Box

- 1. Open Internet Explorer and log in to the unit.
- 2. Click POS & I/O / I/O Settings / I/O Box Settings.
- 3. Enter the information of I/O box.

I/O Box S	ettings						
Devi	ce No						
Device	Name						
Device	е Туре	SCB-C3	+ SCB-C24 💌				
IP Ad	dress				Port		
	ID	Addr:000	•				
Create	M	udify					
I/O Box L	ist						
No.		Name	Туре	IP Addr.	Port	ID	Delete
51001	Bui	lding1	SCB-C28	192.168.8.92	4000	Addr:005	0

- **Device No:** The unique ID system distributes in sequence automatically.
- **Device Name**: The name of the I/O box.
- **Device Type**: The types of I/O box, including SCB-C24, SCB-C26, and SCB-C28.
- **IP Address**: The IP Address of SCB-C31.

- **Port**: The transmission port of SCB-C31.
- **ID**: The ID of the I/O box.
- 4. Click the **Create** button, and the information will be updated in I/O Box List.
- 5. Repeat steps 3 and 4 to add more I/O boxes in the list.
- 6. Click the **Save** button to activate the settings. Meanwhile, system will distribute an unique ID to each device.

4.2.2 Modify I/O Box Information

- 1. Open Internet Explorer and log in to the unit.
- 2. Click POS & I/O / I/O Settings / I/O Box Settings.
- 3. Click the I/O box which you want to modify from the list.
- 4. Modify the information of this I/O box, and click the **Modify** button.
- 5. Click the **Save** button to activate the settings.

4.2.3 I/O Pin Setting

- 1. Open Internet Explorer and log in to the unit.
- 2. Click POS & I/O / I/O Settings / I/O Pin Settings.
- 3. All input and output pins are shown in this page, including the ones from cameras and I/O boxes. Check the box to enable a pin (defaulted), and type a name in the field for each I/O pin.

1/0 Pin Settings				
Device Name		#0 Pin	Name	Output Duration
Location 7	1	Input #0		
	2	Output #0		N/A -
	2	Input #0	Gate	
		Imput#1	Lobby	
	1	Input #2	First Floor	
I/O BOX 51001(Building 2)		Input#3	Second Floor	
no post a rol (postality 2)		Output#0		10 sec. 🕶
		Output#1		N/A 👻
	2	Output #2		N/A 🔹
	1	Output#3		N/A -

- For output pin, you can configure its duration time to control how long output acts after it's triggered. The duration range is 3 sec~60 sec. N/A stands for unlimited.
- 5. Click the **Save** button.

If the box of I/O pin is unchecked, this pin won't be shown on relative application pages. In other words, you cannot do any setting/operation with this pin. See details in next section.

4.3 Relative Configuration and Application

4.3.1 Record on Input Trigger Refer to **Recording Schedule / Event Setup**.

4.3.2 Input and Responding Actions Refer to **I/O Box Input and Responding Action Setup**.

4.3.31/O Control Panel in Live View

Refer to Live View Control Panel.

5.Live view

There are two ways to execute the live view function: with Internet Explorer or with the **Remote Live Viewer** application.

5.1 Internet Explorer

5.1.1 Live View Control Panel

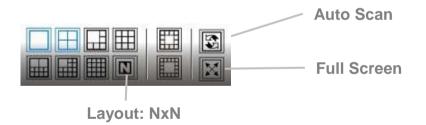

- **PTZ Camera Control**: You may control the camera view by using the PTZ camera control panel to adjust the camera's view. This is only available with cameras that support the PTZ function.
- Set Preset Point / Go to Preset Point: Adjust the camera view and click the *December 2* button to set up this view as preset point. Repeat the process to add more preset points. Click the *December 2* button to see the preset view.
- **Zoom**: Click the + or button to zoom in or zoom out the view.
- Play / Stop / Drop: Select a camera / video and click this button to play/stop/disconnect a particular channel.
- Information Display Window: Display video information including

server name, video current status, and bit rate for a selected channel.

- Start Menu > E-Map: Upload map and drag camera or I/O on it to track device location and alarm status with instant response when an event occurred. See details in the chapter of <u>E-Map</u>.
- Start Menu > I/O Control Panel: Utilize I/O device function remotely.
 User can remotely adjust the Output Pins by turning it on or off.

	🧃 IO Devices		
Click to turn on/off the "Output" pins	Servers: DI Input#0 DO Output#0	192.168.4.223	Show name

- **Playback**: View playback video remotely.
- Auto Scan: Activate auto scan to rotate the channels on the display screen. For instance, you may select to show only 4-split screen on the liveview, while connecting 16 channels to the system. With auto scan function, you are able to see all 16 channels by turns.
- Layout: Click to change the multiple-split layout.

You can right click on the camera screen to enable the following function.

Toggle Fullscreen	Toggle Fullscreen	

- Enable Move: Adjust the current view of camera which supports PT function by dragging the + button on the display screen.
- Enable Digital PTZ: Click the + or button to zoom in or zoom out the view. The lower right square flashing on the video grid indicates the correspondent view of the camera.
- **ImmerVision Lens Setting**: Select the mode of lens, original, PTZ mode, Quad mode and Perimeter mode.
- Vivotek Fish Eye Setting: Select the mode of lens, Original, Rectilinear mode, Full-view panorama mode, Dual-view panorama mode. Type of modes depends on lens location.
- **Stream Profile**: Select the stream profiles, original, low, minimum.
- **Enable Audio**: Enable audio on active channel(s).
- **Snapshot**: Select the snapshot function to capture a specific video image immediately.
- **Toggle Fullscreen**: Select it to view cameras with full screen. Press "Esc" or right click un-select full screen to go back to the original view.

Also, right click on camera list to duplicate and connect/disconnect designate cameras, and do other functions.

Duplicate Camera
Connect
Disconnect
Login Server
Logout Server
Connect All
Disconnect All

- **Duplicate Camera**: Select the duplicate camera function to create multiple views. The duplicated camera will be shown with green indicator as the right picture. Combine this function with digital PTZ, users are allowed to enlarge different spots and view them in different channels without failing to record the whole view.
- **Connect / Disconnect**: Click to connect or disconnect the designate camera.
- Login / Logout Server: Click to login or logout.
- Connect All / Disconnect All: Click to connect or disconnect all cameras.

5.1.2 Live View Setting

- 1. Open Internet Explorer and log in to the unit.
- 2. Set the cameras.
- 3. Click the **Live View** button on the top of the page.
- 4. Select a camera(s) from the camera list on the right and then drag it to where you wish the image to be displayed.

When running Internet Explorer, do not use the function "Open in New Window". Using this function may cause Internet Explorer to become unstable.

5.1.3 General Setting

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Live View** button on the top of the page.
- 3. Click the **General Setting** button.
- 4. Click the **General** tab.

- 5. Check the **Enable audio on active channel** option to enable audio streaming on active channel. This function synchronizes with right click on camera to enable audio.
- 6. Check **Synchronize video frames** to avoid the tearing problem occurring in video display while increasing the CPU loading.
- 7. Click the **OK** button.

5.1.4 Stream Profile Setting

Select the preferred stream type of each camera as default live view profile.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Live View** button on the top of the page.
- 3. Click the **General Setting** button.
- 4. Click the **Camera** tab.

- **Parameter**: Choose the preset point from the drop-down menu.
- **Default**: Click to back to default setting.
- **Import**: Click to import the settings.
- **Export**: Click to export the settings.
- 4. Click the **OK** button.

5.2.11 Set up Remote Live Viewer

- 1. Startup > NUUO NVRmini 2 > Remote Live Viewer.
- 2. Click the unit you wish to access in your remote server list.
- 3. Click the **LOG IN** button to access your unit.
- 4. Select a camera(s) from the camera list on the right and then drag it to where you wish the image to be displayed.

6.E-Map

There are two ways to execute the live view function: by Internet Explorer or by **Remote Live Viewer** application.

With E-map, user can easily track the device location and alarm status with instant response when an event occurs. The arrows and lightening icon on E-map represent cameras and I/O devices. These icons will turn red as being triggered by alarms.

There are two modes in E-map application, Edit Mode and Browse Mode.

- **Edit Mode**: The function buttons on the bottom of this E-map dialog will be active. Users can add/edit/delete maps and indicators of devices.
- Source Browse Mode: Users are not allowed to do any configuration but check the map hierarchies and device list to see indicators and related information.

6.1 Internet Explorer

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Live View** button on the top of the page.
- 3. Click the **Start Menu** button and select **Open E-Map**.

6.1.1 E-Map Control Panel

Device and Map Tree List

E-Map Picture

Preview Window and Information

- Map: Select a map you want to show on E-map Window.
- Camera: Select the camera to see preview video or mark indicator on

E-map.

- **Digital Input**: Select it to highlight the device with green ring on map and show status on Information Window. If the Digital Input is from IP camera, the preview window will display live video of the camera.
- **Digital Output**: Select it to highlight the device with green ring on map and show status on Information Window. If the Digital Output is from IP camera, the preview window will display live video of the camera.
- Map Indicator: Clicking the indicator will lead to the next map layer. If you want to move to the upper layer, select it by mouse directly or click
 icon on the map.
- Camera Indicator: The indicator of cameras dragged from Device and Map Tree List to show preview video and related information. When event occurs, the color of indicator will turn red.
- Jigital I/O Indicator: The indicator of I/O devices dragged from Device and Map Tree List to show related information. When event occurs, the color of indicator will turn red.
- **Information Window**: The window shows the related information of each indicator.
 - Map: Show map name.
 - > Camera: Show camera name and connecting status.
 - Digital Input: Show Digital Input name and status (0 or 1).
 - > Digital Output: Show Digital Output name and status (0 or 1).

6.1.2 Add Map

- 1. Make sure being in "Edit Mode" and all devices are inserted and connected.
- 2. Right click on the Map icon [₩] in Device and Map Tree List to obtain the option menu to add map, or just click the **Add Map** button to configure.

Map Config	×
Map Image File:	
Map Name:	OK Cancel

- 3. Select a map file and insert a name. Click the **OK** button, and then the map you added appears in the Device and Map Tree List.
- 4. The map indicator solution appears on the upper left of map. Drag it to the position you want on appointed map.

- 5. Repeat steps 2 through 4 to add more maps.
- 6. Click the **Upload** button to activate all the settings.

The maximum file size of each map is 500KB. There are 10 layers of map, and the map capacity of each layer is 10.

6.1.3 Edit Map

- 1. Make sure being in "Edit Mode" and all devices are inserted and connected.
- 2. Right click on the Map icon ₩ in Device and Map Tree List to obtain the option menu to edit map, or just click the **Edit Map** button to configure.
- 3. Repeat step 2 to edit more maps.
- 4. Click the **Upload** button to activate all the settings.

6.1.4 Delete Map

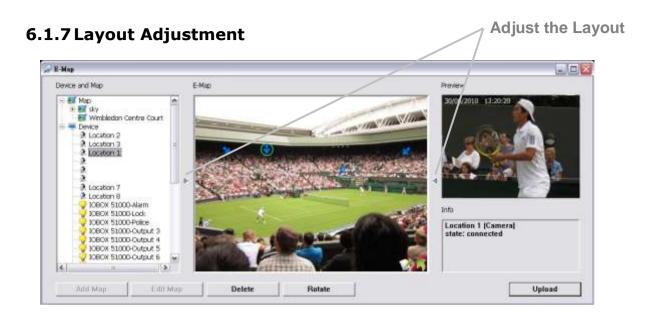

- 1. Make sure being in "Edit Mode" and all devices are inserted and connected.
- 2. Right click on the Map icon ₩ in Device and Map Tree List to obtain the option menu to delete map, or just click the **Delete** button.
- 3. Repeat step 2 to delete more map.
- 4. Click the **Upload** button to activate all the settings.

6.1.5 Add/Rotate Device Indicator

- 1. Make sure being in "Edit Mode" and all devices are inserted and connected.
- 2. Select the map which you want to add device indicator on.
- 3. Select a device from list and directly drag it to the desired location on the map.
- 4. Select a camera indicator and right click on the indicator or click the **Rotate** button to adjust the direction of camera indicator if needed.
- 5. Repeat steps 2 and 4 to add more indicators on.
- 6. Click the **Upload** button to activate all the settings.

6.1.6 Delete Device Indicator

- 1. Make sure being in "Edit Mode" and all devices are inserted and connected.
- 2. Select the indicator and right click on the indicator or click the **Delete** button.
- 3. Repeat step 2 to delete more indicators.
- 4. Click the **Upload** button to activate all the settings.

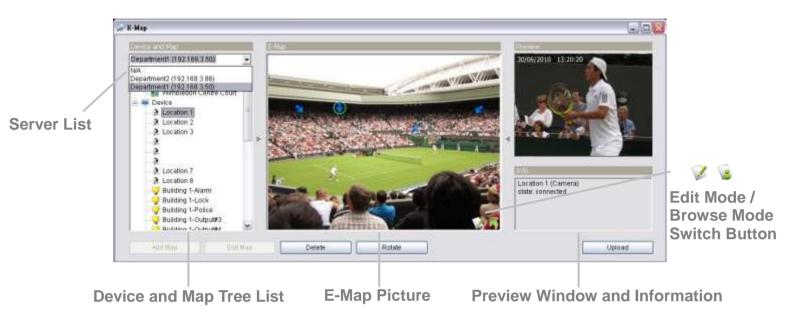

- Adjust the Layout: Click the triangular indicator to hide the Device and Map Tree List / Preview and Information Window on right and left side of the window. Click the indicator again to back to the default.
- Maximize the Map: Click the icon on the upper right to get the full screen display of E-map.

6.1.8 Relative Configuration and Application

When an event occurs, related E-map pops up to indicate the location of this event. Please check the **Notification** function for details.

6.2 Remote Live Viewer Application

- 1. Startup > NUUO NVRmini 2 > Remote Live Viewer.
- 2. Click the **Start Monitor** button and select Open E-Map.

6.2.1 E-Map Control Panel

• **Server List**: Select a server to display the E-map of the server.

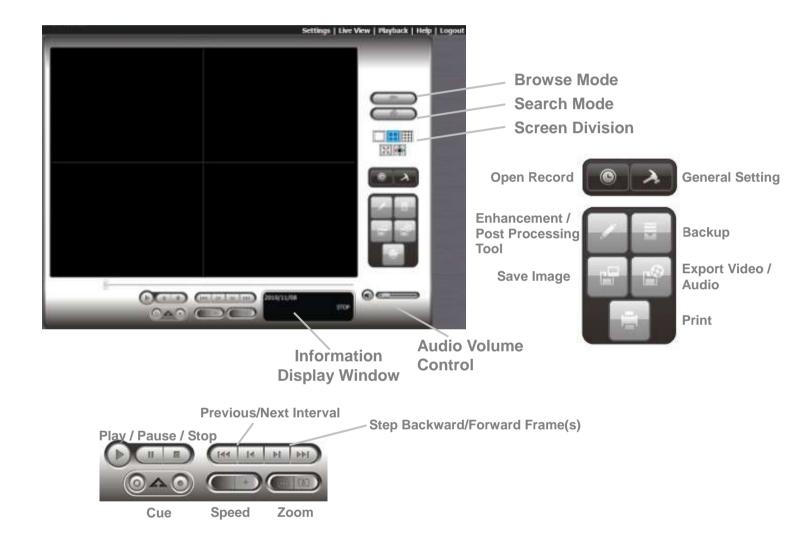

The E-Map function of Remote Live Viewer is quite similar with the one in Internet Explorer, so you can refer to the section of **Internet Explorer** for the details.

7.Playback

There are two ways to execute the playback function: with Internet Explorer or with the **Playback System** application.

7.1 Internet Explorer

7.1.1 Playback Control Panel

- Information Display Window: Displays video date and time, cue-in / cue-out point times, and speed.
- Audio Volume Control: Adjust the sound level.
- Screen Division: Allocate the sub-screen display by clicking on the desired layout icon. To switch to single camera display, double click a particular sub-screen. Double click the screen again to regain previous screen division layout.
- **Browse Mode**: Play the recorded video when in Search Mode.

- **Open Record**: Click the **Open Record** button to access the Date-Time Panel and select the video records which you want to review.
- General Setting
 - Record Display
 - Calendar View: view the Record Display Window as a calendar.
 - List Control: view the Record Display Window as a list control.
 - Play
 - Play when open: check this option to set the system to start playing the video clip every time a record is withdrawn.
 - Auto-skip when recording in motion-only mode: check this option to set up the system to automatically skip to the points where there were motions recorded.
 - Next interval: set the interval with which the video goes forward when you click the **Next** button on the control panel.
 - Previous interval: set the interval with which the video goes backward when you click the **Previous** button on the control panel.
 - Capture Image
 - Save in clipboard: the image will be saved in the clipboard and can be pasted to other application software.
 - Manually save the image file: you can manually select where you want to save the image, name the saved file, and choose the format you want to save the image.
 - Automatically save the image file: by presetting a path/URL and the image format, the system will automatically save the image accordingly when you click the **Save Image** button on the control panel.

You can right click on the camera screen to enable the following function.

Toggle Fullscreen

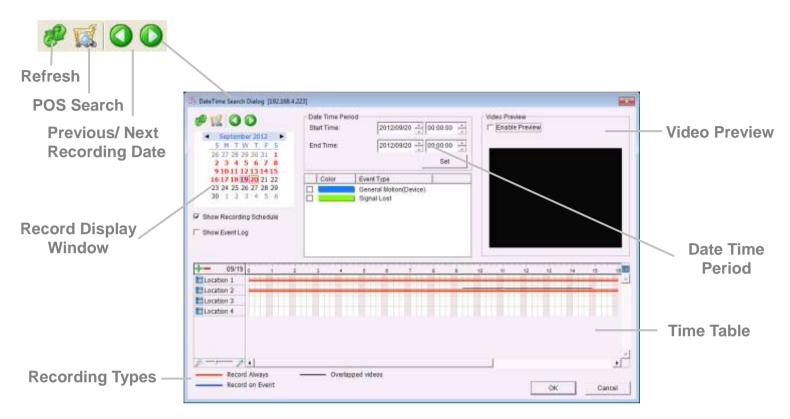

Enable ImmerVision PTZ

ImmerVision Lens Setting 🔸

Toggle Fullscreen Enable Vivotek FishEye PTZ Vivotek FishEye Lens Setting

- **Toggle Fullscreen**: Select it to view cameras with full screen. Press "Esc" or right click un-select full screen to go back to the original view.
- Enable ImmerVision PTZ: Adjust PTZ in PTZ mode.
- **ImmerVision Lens Setting**: Select the mode of lens, original, PTZ mode, Quad mode and Perimeter mode.
- Enable Vivotek Fish Eye PTZ: Adjust PTZ in PTZ mode.
- Vivotek Fish Eye Setting: Select the mode of lens, Original, Rectilinear

mode, Full-view panorama mode, Dual-view panorama mode. Type of modes depends on lens location.

7.1.2 Search the Recorded Video

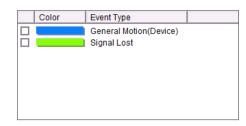

- 🖉: refresh the Record Display Window.
- Or O: go to previous or next recording date.
- **Record Display Window**: Display the available recorded video records.
- **Date Time Period**: Select the start and end time points that indicate the time period you would like to view after choosing cameras.
- Video Preview: Check the Enable Preview option to view the selected video.
- Time Table (preset recording schedule): Click the
 icon to select all channels; click the
 icon to deselect all channels. Finally, use the

• **Recording Types**: Red line in bold represents always record. Blue line in bold represents record on event. Red thin line represents recording data. Black thin line represents that there are multiple video clips within the same period due to system time change (e.g. daylight saving time)

----- Record Always ------ Record on Event ------ Overlapped videos

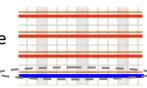

• Show Recording Schedule: Show the period of recording schedule in the time table.

• Show Event Log: Show the time of event detection in the time table. Color of event type can be defined by preference.

14	114	H	1
	Official and the		
			_
_			_

 From the Record Display Window at the top left of the Date Time Panel, select the date you want to search the record from. The red lines shown on the time table indicate available recorded video records.

- 2. Use color bars to differentiate recording types from each other. This will help you select video clips.
- 3. Highlight the video clip you want to review by left-clicking and dragging the time period. You may also utilize the Start Time and End Time in Date Time Period Section after choosing camera. In addition, modify the scale of the time table with the 🔎 or 🔎 icon on the bottom left.
- 4. If there are multiple videos of the time period you select, the following dialog may popup to guide you to select one to play.

ere are multiple video clips wi ange. Please select one to pla		iod due to syste	em time
Camera Name: Location 2			2
• 1st: from 2012/03/26 12	2:45:18 to 2012/0	03/26 12:50:18	3
C 2nd: from 2012/03/26 1	2:44:07 to 2012/	03/26 12:49:0	7
			_

- 5. Check the **Enable Preview** option to get the preview of the video you select.
- 6. Click the camera name to increase or decrease cameras you want to playback.
- 7. Click the **OK** button.

The Record Display Window can be shown in (a) calendar view or (b) list control view. To modify the settings of the record display window, click the **General Setting** button at the right of the page.

7.1.3 Play the Recorded Video

- 1. Be sure that you have set the schedule / recording event first.
- 2. Open Internet Explorer and log in to the unit.
- 3. Click the **Playback** button on the top of the page.
- 4. Click the **Open Record** button.
- 5. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
- 6. Highlight the video records that you want to review.
- 7. Click the **OK** button.

7.1.4 Intelligent Search

After opening the recorded video, click the **Search Mode** button to obtain the Intelligent Search Tool panel. You can search for unusual events during the recording period.

There are 5 types of unusual events: *General Motion*, *Foreign Object*, *Missing Object*, *Focus Lost*, and *Camera Occlusion*.

- **General Motion**: Detect all movements in the defined area.
- Define detection zone by dragging to draw a detection zone. You may define more than one zone by repeating this step.
- Modify the sensitivity setting by changing the slider control. Moving toward the right will increase the sensitivity level, which means a relatively small movement will trigger the alarm.
- 3. Set the interval. Moving toward right will increase time interval so that the alarm will only be triggered when the movement lasts longer.

Smart Search	×
Alarm Event Type	
General Motion	-

C Define object size	
All	Clear
Draw RegionStop when found	
Search	Stop

- 4. Check the **Stop when found** option. If unchecked, the search tool will list all the events it found, instead of stopping at the moment the event found.
- 5. Click the **Search** button.
 - Foreign Object: Alarm is set on when any additional object appears in the defined area on the screen.

- 1. Define detection zone by dragging to draw a detection zone.
- 2. Modify the sensitivity setting.
- 3. Set the Interval.
- 4. Check the **Stop when found** option. If unchecked, the search tool will list all the events it found, instead of stopping at the moment the event found.
- 5. Click the **Search** button.
- **Missing Object**: Alarm is set on when the selected object is removed from the defined area on the screen.
- 1. Define detection object by dragging to draw a detection zone.
- 2. Modify the sensitivity setting.
- 3. Set the Interval.
- 4. Check the **Stop when found** option. If unchecked, the search tool will list all the events it found, instead of stopping at the moment the event found.
- 5. Click the **Search** button.
- **Focus Lost**: System will inform you when the camera(s) lose its focus.
- **Camera Occlusion**: Alarms when the camera is blocked.

7.1.5 Recorded Video Enhancement

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Playback** button on the top of the page.
- 3. Click the **Open Record** button.
- 4. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
- 5. Highlight the video clip you want to review, and then click the **OK** button.
- 6. Click the **Enhancement** button.
- 7. Check the General Setting.
- Apply active channel: The settings will only be applied to the selected channel.
- Apply all channels: The settings will be applied to those currently shown on the screen.
- 8. Set the Filter Setting.
 - Visibility: Check the option and adjust the gamma value of the image to enhance the image and make

it cleaner.

- **Sharpen**: Check the option to activate the function. Move the slider control to the right to sharpen the image, to the left to soften it.
- **Brightness**: Check the option to activate the function. Move the slider control to the right to make the image brighter.
- **Contrast**: Check the option to activate the function. Move the slider control to the right to increase contrast.
- **Grey Scale**: Check the option to show the record in gray-scale mode so the image displays in black and white.
- 9. Click the **OK** button.
 - **Stop**: Stop the enhancement function and close the enhancement tool. (The system will automatically back to the default settings.)
 - **Default**: Back to the default settings, however, the enhancement tool still works.
 - **OK**: Apply the modifications of the settings.

7.1.6 Save a Video

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Playback** button on the top of the page.
- 3. Click the **Open Record** button.
- 4. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
- 5. Highlight the video clip you want to review, and then click the **OK** button.
- 6. Choose the camera display that you want to save as a video clip.
- 7. Set up the cue in and cue out points; the cue in and cue out time will be shown on the information window.

8. Click the **Save Video** button.

Export Video/Audio		×
Export File Path:

End Time:	2012/09/20 09:30:08	
Export Audio		
Export OSD		
🔲 Export Metadata Transa	action	
	OK Cancel	

- 9. Choose the folder where you want to save the file.
- 10. Insert the file name and click the **Save** button.
- 11. Choose the export format.
- 12. Choose the use profile.
- 13. Check to export the recorded video with Audio, OSD and POS Transaction.
- 14. Click the \mathbf{OK} button.

We recommend that you export to the .asf format when saving video. In exporting to the .avi format, the frame rate will be increased when playing in the video player, causing the video to run faster than normal.

7.1.7 Save an Image

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Playback** button on the top of the page.
- 3. Click the **Open Record** button.
- 4. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
- 5. Highlight the video clip you want to review, and then click the **OK** button.
- 6. Choose the camera display that you want to save pictures.
- 7. Click the **Save Image** button when the image you want is shown on the screen.
- 8. Choose the folder where you want to save the file at.
- 9. Choose the folder and the image format (BMP or JPEG) you prefer.
- 10. Insert the file name.
- 11. Click the **Save** button.

You may skip step 3 by presetting the folder where you want to save the images and the format you want to save them in.

7.1.8 Print an Image

Print the current image of the video you choose.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Playback** button on the top of the page.
- 3. Click the **Open Record** button.
- 4. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
- 5. Highlight the video clip you want to review, and then click the **OK** button.
- 6. Choose the camera display from which you want to print pictures.
- 7. Click the **Print** button when the image you want is shown on the screen.
- 8. Set print settings.

🍐 Print Setup	×

 - > Print in original size: Check to have the image print in original size.
 - > Fit the page: Check to have the image fit the page.
 - > Align Image: Top, center, or bottom
- 9. Click the **Print** button.

7.1.9 Backup the Recorded Video

Different from Save Video, the Backup function will save all the recorded videos which belong to the time slot you set, instead of the clips.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Open Record** button to select data.
- 3. Click the **Backup** button.

Date Time Period

7.2 Remote Playback System Application

7.2.1 Playback System Application Control Panel

The **Playback System** control panel is similar to the playback panel in Internet Explorer. Check **Playback Control Panel** for more details about those buttons.

7.2.2 Set up Unit Connections

Before using the **Playback System** application, you need to set a connection to your unit first.

- 1. Startup > NUUO NVRmini 2 > Playback System.
- 2. Click the **General Setting** button.
- 3. Click the **Server** tab.

Server Setting Server Name:	[Sengway 211 (192.168.4.223
Address Port User Name:	5160	
Password	Save Password ["	
	Test Server	5
Add	Delete	

- 4. Insert the name of your unit.
- 5. Insert the IP address of that unit.
- 6. Modify the port if necessary.
- 7. Insert the user name.
- 8. Insert the password.
- 9. Check the **Save Password** option.
- 10. Click the **Test Server** button to test the connection between the local application and the remote unit.
- 11. Click the **Add** button to add this unit into the remote server list.
- 12. Click the **OK** button.

7.2.3 Search the Recorded Video

- 1. Startup > NUUO NVRmini 2 > Playback System.
- 2. Click the **Open Record** button.
- 3. Click the 🗳 icon on the top of the Date-Time Panel to obtain the Remote Playback Site Management dialog, and then select the server you want to access.
- 4. Highlight the records you want to view in the Time Table.
- 5. Set the Date Time Period.

The search process in the **Playback System** application is similar to that of Internet Explorer. Check **Search the Recorded Video** for more details about the setting process.

7.2.4 Play the Recorded Video

- 1. Be sure that you have set up the recording schedule / response first.
- 2. Startup > NUUO NVRmini 2 > Playback System.
- Click the General Setting button and the Server tab to set connections to your unit. See <u>Set up Unit Connections</u> for more details.
- 4. Click the **Open Record** button.
- The Record Display Window will show the information of the available video clips. Select the date you want to search the record from. Check <u>Search</u> <u>the Recorded Video</u> for more details.
- 6. Highlight the video records that you want to review.
- 7. Select the start and end points in Date Time Period to adjust the time slot.
- 8. Click the **OK** button.

7.2.5 Intelligent Search

- 1. Startup > NUUO NVRmini 2 > Playback System.
- 2. Click the **Open Record** button.
- The Record Display Window will show the information of the available video clips. Select the date you want to search the record from. Check <u>Search the Recorded Video</u> for more details.
- 4. Highlight the video records that you want to review.
- 5. Choose the camera display for which you want to implement smart search.
- 6. Click the **Search Mode** button to open the Intelligent Search Tool panel.
- 7. Set up unusual events here to detect abnormalities occurring during the

recoding period. Check **Intelligent Search** for more details.

8. The searched events will be listed. Click to find that event.

There are 5 types of unusual events: *General Motion*, *Foreign Object*, *Missing Object*, *Focus Lost*, and *Camera Occlusion*.

- **General Motion**: Detect all movements in the defined area.
- Foreign Object: Alarm when any additional object appears in the defined area on the screen.
- **Missing Object**: Alarm when the selected object is removed from the defined area on the screen.
- Focus Lost: System will inform you when the camera(s) lose focus.
- **Camera Occlusion**: Alarm when the camera is blocked.

The intelligent search in the **Playback System** application is similar to that of Internet Explorer.

7.2.6 Recorded Video Enhancement

- 1. Startup > NUUO NVRmini 2 > Playback System.
- 2. Click the **Open Record** button.
- The Record Display Window will show the information of the available video clips. Select the date you want to search the record from. Check <u>Search the Recorded Video</u> for more details.
- 4. Highlight the video records that you want to review.
- 5. Choose the camera display that you want to implement video enhancement.
- 6. Click the **Enhancement** button.
- 7. Check the General Setting.
- Apply active channel: The settings will only be applied to the selected channel.
- Apply all channels: The settings will be applied to those currently shown on the screen.
- 8. Set the Filter Setting.
 - Visibility: Check the option and adjust the gamma value of the image to enhance the image and make it cleaner.
 - **Sharpen**: Check the option to activate the function. Move the slider

control to the right to sharpen the image, to the left to soften it.

- **Brightness**: Check the option to activate the function. Move the slider control to the right to make the image brighter.
- **Contrast**: Check the option to activate the function. Move the slider control to the right to increase contrast.
- **Grey Scale**: Check the option to show the record in gray-scale mode so the image displays in black and white.
- 9. Click the **OK** button.
 - **Stop**: Stop the enhancement function and close the enhancement tool. (The system will automatically revert back to the default settings.)
 - **Default**: Back to the default settings, however, the enhancement tool still works.
 - **OK**: Apply the modifications of the settings.

7.2.7 Save a Video

- 1. Startup > NUUO NVRmini 2 > Playback System.
- 2. Click the **Open Record** button.
- The Record Display Window will show the information of the available video clips. Select the date from which you want to search the record. Check <u>Search the Recorded Video</u> for more details.
- 4. Highlight the video records that you want to review.
- 5. Choose the camera display that you want to save as a video clip.
- 6. Set up the cue in and cue out points; the cue in and cue out time will show on the information window.

- Cue In Cue Out
- 7. Click the **Save Video** button.
- 8. Choose the folder where you want to save the file.
- 9. Insert the file name and click the **Save** button.
- 10. Choose the export format.
- 11. Choose the use profile.
- 12. Check the **Export Audio** option.
- 13. Click the **OK** button.

7.2.8 Save an Image

- 1. Startup > NUUO NVRmini 2 > Playback System.
- 2. Click the **Open Record** button.
- The Record Display Window will show the information of the available video clips. Select the date from which you want to search the record. Check <u>Search the Recorded Video</u> for more details.
- 4. Highlight the video records that you want to review.
- 5. Choose the camera display from which you want to save pictures.
- 6. Click the **Save Image** button when the image you want is shown on the screen.
- 7. Choose the folder where you want to save the file at.
- 8. Choose the format of image (BMP or JPEG) you prefer.
- 9. Insert the file name.
- 10. Click the **Save** button.

Q

You may skip step 7 by presetting a folder where you want to save the images and a format which you want to save the images in.

7.2.9 Print an Image

Print the current image of the video you choose.

- 1. Startup > NUUO NVRmini 2 > Playback System.
- 2. Click the **Open Record** button.
- The Record Display Window will show the information of the available video clips. Select the date you want to search the record from. Check Search the Recorded Video for more details.
- 4. Highlight the video records that you want to review.
- 5. Choose the camera display that you want to print pictures.
- 6. Click the **Print** button.
- 7. Set the print settings.
- **Print Content**: Print the image from currently selected channel or all the channels shown on the screen.
- Page Setting
 - > Print in original size: Select to have the image print in original size.
 - > Fit the page: Select to have the image fit the page.
 - Align Image: Top, center, or bottom

7.2.10 Backup the Recorded Video

Different from Save Video, the Backup function will save all the recorded videos which belong to the time slot you set, instead of the clips.

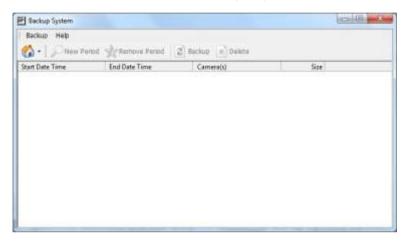

- 1. Startup > NUUO NVRmini 2 > Playback System.
- 2. Click the **Open Record** button to select data.
- 3. Click the **Backup** button.
- 4. Set the Start Time and End Time you want to backup.
- 5. Select the cameras you want to backup.
- 6. Select the directory you want to save the backup data.
- 7. Click the **Backup** button.

8.Backup and Delete Records

8.1 The Backup System Application

In addition to the ways mentioned in the previous chapters, you can apply the application to backup your files.

1. Startup > NUUO NVRmini 2 > Backup System.

2. Click the **Remote Server Site** 🚳 button to set up remote server.

Server Setting Server Name:				
Address:				
Port:	5160			
User Name:				
Password:				
	🗖 Save Pas	sword		
	Test	Server		
Add	Delete	Update	50.	

- 3. Insert the name of your unit.
- 4. Insert the IP address of that unit.
- 5. Modify the port if necessary.

- 6. Insert the user name.
- 7. Insert the password.
- 8. Check the **Save Password** option.
- 9. Click the **Test Server** button to test the connection between the local application and the remote unit.
- 10. Click the **Add** button to add this unit into the remote server list.
- 11. Click the **OK** button.
- 12. Click the **v** button next to **Remote Server Site** button, and select one of

servers you added.

21. Click the **OK** button.

8.2 Backup the Recorded Video through Windows Explorer

- Find your unit through Windows Explorer (insert "\\" plus the IP address of your unit)
- 2. Open the "public" folder.
- 3. Insert the name and password of the administrator.

- 4. Select the volume and open the "VIDEODATA" folder.
- 5. Copy the date folder which you want to backup to your desktop / laptop.

8.3 Backup the Recorded Video through FTP

- 1. Find your unit through Windows Explorer (insert "ftp://" plus the IP address of your unit)
- 2. Insert the name and password of the administrator.
- 3. Select the volume and open the "VIDEODATA" folder.
- 4. Copy the date folder which you want to backup to your desktop / laptop.

8.4 Playback the Backup Records

8.4.1 With Playback Application

- 1. Use the Backup System application to backup your records.
- 2. Check the **Include Playback application** option, which will add the **Playback** application into the backup folder.
- 3. Open that folder.
- 4. Double-click the Playback application icon.
- 5. Select the recorded data to play back.

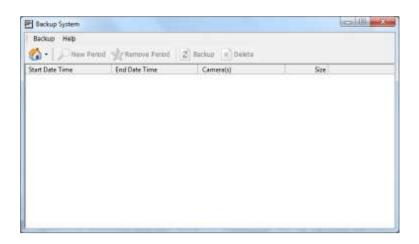

8.4.2 Without Playback Application

- 1. Use the Playback function to backup your records.
- 2. Put your backup folder into the program folder of NVRmini 2. (Default directory is "C:\Program Files\NUUO\NVRmini2".)
- 3. Startup > NUUO NVRmini 2 > Playback System.
- 4. Click the **Open Record** button.
- 5. Select the recorded data to play back.

8.5 Delete the Recorded Video

8.5.1 With Backup Application

1. Startup > NUUO NVRmini 2 > Backup System.

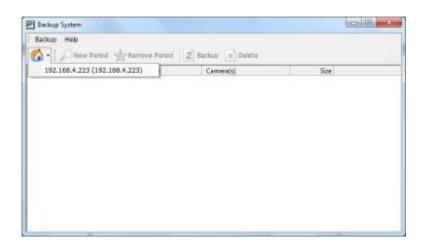

2. Click the **Remote Server Site** 🚳 button to set up remote server.

- Server Setting		
Server Name:		
Address:		
Port	5160	
User Name:		
Password:		
	C Save Password	
	Test Server	
Add	Delete Update	

- 3. Insert the name of your unit.
- 4. Insert the IP address of that unit.
- 5. Modify the port if necessary.
- 6. Insert the user name.
- 7. Insert the password.
- 8. Check the **Save Password** option.
- 9. Click the **Test Server** button to test the connection between the local application and the remote unit.
- 10. Click the **Add** button to add this unit into the remote server list.
- 11. Click the **OK** button.
- 12. Click the < button next to **Remote Server Site** button, and select one of

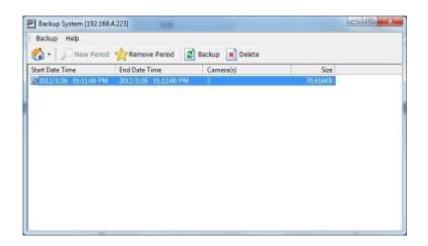

servers you added.

13. Click the **New Period** button to select the record date.

September 2012 Septembe	[Video Preview	
30 1 2 3 4 5 6 Show Recording Schedule Dhow Event Log Our 20 4 2 5 6 Dhow Event Log Locaten 1 Locaten 2 Locaten 2	ghil Logi	-10 10	2 42 M 13 19
Location 4			

- 14. Set the Start Time and End Time. (or highlight the video records which you want to delete)
- 15. Select the cameras you want to delete the records.
- 16. Click the **OK** button.
- 17. Select the time slot which you want to delete.

- 18. Click the **Delete** button.
- 19. Confirm the check dialog.

8.5.2 Without Backup Application

- Find your unit through Windows Explorer (insert "\\" plus the IP address of your unit).
- 2. Open the "public" folder.
- 3. Insert the name and password of the administrator.
- 4. Select the volume and open the "VIDEODATA" folder.
- 5. Select the date folder which you want to delete.
- 6. Delete the folder.

In order to keep the system stable, do not delete recorded data from the day in which you do the delete process.

9.Verification Tool

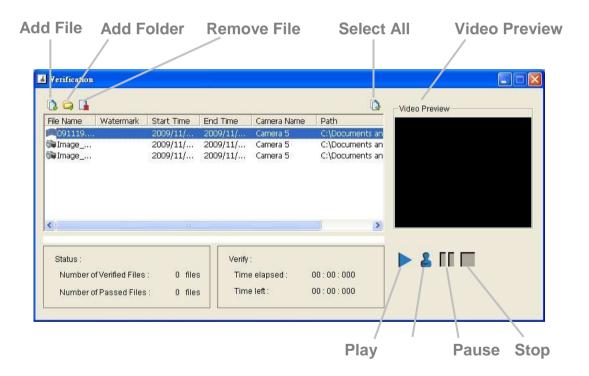

The Verification Tool verifies whether the data created by the system has been tampered with. It's the process by which a digital watermark (a digital signature) is added to each recorded video frame to ensure its authenticity.

There are three types of data could be verified by Verification Tool:

- 1. File in (.dat) (.264) format will be displayed as \checkmark .
- 2. File in (.avi) (.asf) format will be displayed as *m*.
- 3. File in (.bmp) (.jpg) format will be displayed as 🛸.

9.1 Execute Verification Tool

- 1. Startup > NUUO NVRmini 2 > Verification Tool.
- 2. Verification Tool Overview

- Add File: Insert the single file to list for verification.
- Add Folder: Choose the folder with multiple files to list for verification.
- **Remove File**: Remove indicated file(s) from list.
- **Select All**: Select all files in list for verification.

Choose the file type first before selecting files. Only (.dat) (.264) (.avi) (.asf) (.bmp) (.jpg) are available to open.

Video Preview: Preview designate file in verification list. Select the buttons below to play ▶, pause ■, and stop ■ the video file.

9.2 Verify Image / Video

- 1. Select single or multiple files for verification.
- 2. Click the **Verify button** to start verification.
- 3. The verification result will show on watermark column. If a file was tampered with, it will show **≭**; if a file passed verification, it will show **✓**.

) 🔾 🔒					۵	Video Preview

Verification report

4. The verification report will indicate the information related to the verification.

10. External Storage

Total recording space of 4 bay unit can be expanded largely by connecting DAS through eSATA port. Follow the directions to enlarge your recording space.

10.1Create a Volume on DAS

The current compatible DAS is AXUS FiT Series. We don't guarantee the quality of other DAS models. Please refer to the manual of AXUS FiT Series to create a single volume on DAS.

We are unable to create a volume on external storage in NVR setting page, so do NOT skip this step before connecting to NVR device.

10.2Create an External Storage

- 1. Log in to the unit.
- 2. Click RAID & File System / RAID Management.
- 3. You will find External SATA Disk displayed in Disk List.

RAID Status	eato Delete Format			
🖒 RAID Status				
List	Status			
- Valumes		RAD frame	VOLUME1	
- VOLUMET		RND Level	RAIDO	
Disk 2		RAD Status	Functional	
- Free Disks		Total Capacity	298.08 GB (305244 MB)	
		Free Capacity	290.24 GB (297208 MB)	
Disk 6 (eGATA)		Used Capacity	3.15 GB (3244 MB)	
		Usage	1	2%
		Update Time	Friday, November 18, 2011 4:15:29 PM	
		Total Devices	1	
		Active Devices	1	
		Failed Devices	0	
		Spare Devices	0	
	Fi	ormat Programa		
	Rec	overy Progress		

4. Click on the eSATA disk directly to check the disk drive information.

RAID Status Mining 9000	te Delete Format		
😸 RAID Status			
List	Status		
Volumes VOLUME1 Disk 2 Free Disks	Model Capacity Firmware Vecsion	0957	
- Free Disks Disk 6 (eSATA)	Senal No Smart Support Smart Enable		

Refer to the section of **Create a RAID Volume** to create a volume for it. You can either create a volume with eSATA and embedded disk(s), or create an isolate volume with eSATA disk only.

11. Log out

Click the **Logout** button on the top of the page to log out of the system. If there is no action in 10 minutes, the system will log out automatically to avoid unauthorized access.

12. Remote PC System Requirements

Remote PC Minimum Requirements				
Model	2/4 bay			
OS	Windows XP 32 bit, Windows 7 32/64 bit			
Supported				
CPU	Intel Core 2 Duo, 2.6GHz			
RAM	1GB			
User	1. HTTP Web browser - Internet Explorer 8 and			
Interface	later			
	2. NUUO client application program			

13. Troubleshooting

13.1 Replace a Failed Disk Drive

If a disk drive fails, the Disk Status LED becomes orange. If the disk drive belongs to a RAID Volume, the Volume goes Critical or Offline, depending on RAID level. See **Check RAID Volume Status** for details.

Replace the failed disk drive with a new disk drive of the same or slightly greater capacity. You do not have to power down the unit. Refer to **Modify RAID Volume** to remove the failed disk and replace it with a new one.

13.2Respond to a Critical RAID Volume

How the unit responding to a Critical RAID Volume depends on the RAID level of your Volume:

- For **RAID 1, 5, and 10** volumes, you must replace the failed disk drive with a new one. The RAID Volume will begin rebuilding itself when you install the new disk drive. See **Replace a Failed Disk Drive** for details.
- **RAID 0** volumes go offline after a disk drive failure. A **RAID 0** Volume cannot be recovery. All data of the volume is lost.

13.3 Respond to a File System Error RAID Volume

When encountering file system error, you are unable to keep the data anymore. It's likely due to abnormal usage and disk damage. In this case, if you want to keep recording, we suggest replacing new disks, or try the following methods.

- 1. Format this volume, and check if the status becomes *functional*. If yes, you can start recording. If it doesn't, try the second method.
- Delete this volume, and create volume again to see if the status is functional.

13.4Restore the Default Administrator's Password

If you forget the password, and want to reset the Administrator's password to the default password: **admin**, follow the following steps.

- 1. Verify that the system is fully booted.
- 2. Insert your reset tool into the reset button hole on the back of the device.

- 3. Press and hold the reset button for 8 seconds, release your hands until the buzzer beeps one time and the System Status LED flashes in blue.
- 4. System will restart and the Administrator's password is now reset to **admin**.

13.5 Restore All Default Configuration

If you want to restore all configurations to default setting, follow the following steps.

- 1. Verify that the system is fully booted.
- 2. Insert your reset tool into the reset button hole on the back of the device.
- 3. Press and hold the reset button for 14 seconds, release your hands until the buzzer beeps twice and the System Status LED flashes in orange.
- 4. System will restart and all settings are reset to default.

RAID volume and data within the volume won't be reset to default. Refer to **Format** for the details.

13.6Install ActiveX

If you cannot see the complete page of the system when using Internet Explorer, it may be because the ActiveX installation process is not completed.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Live view / Playback** button on the top right.
- 3. The browser will ask whether to install ActiveX.

- 4. Click the upper bar to begin the installation process.
- 5. Click the **Install** button to complete the process.

13.7Cannot Log in to the Unit with Internet Explorer

- 1. Check the settings of your antivirus software.
- 2. Change to appropriate settings or turn off this antivirus software.

Please visit NUUO wiki for more information. http://support.nuuo.com/mediawiki/index.php/Main_Page

Appendix – RAID System

Introduction to RAID

RAID (Redundant Array of Independent Disks) allows multiple disk drives to be combined together into a RAID Volume. You will create a RAID Volume on your unit when you perform the setup procedure.

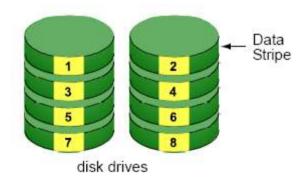

The benefits of a RAID can include:

- Higher data transfer rates for increased server performance
- Increased overall storage capacity for a single Volume
- Data redundancy/fault tolerance for ensuring continuous system operation in the event of a disk drive failure

Different RAID levels use different organizational models and have varying benefits. The following outline breaks down the properties for each RAID level supported on this unit:

RAID 0 – Stripe

When a RAID Volume is striped, the read and write blocks of data are interleaved between the sectors of multiple disk drives. Performance is increased, since the workload is balanced between drives or "members" that form the RAID Volume. Identical drives are recommended for performance as well as data storage efficiency.

The RAID Volume's data capacity equals the capacity of the smallest disk drive times the number of disk drives. For example, one 100 GB and three 120 GB drives will form a 400 GB (4 x 100 GB) RAID Volume instead of 460 GB.

If disk drives of different capacities are used, there will also be unused capacity on the larger drives.

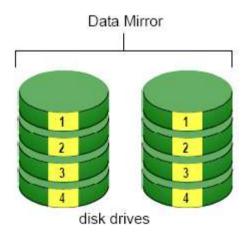

Because RAID 0 does not offer Fault Tolerance, meaning that you cannot recover your data after a disk drive failure, we do not recommend a RAID 0 Volume for your unit.

RAID 0 Volumes on this unit consist of one or more disk drives.

RAID 1 – Mirror

When a RAID Volume is mirrored, identical data is written to a pair of disk drives, while reads are performed in parallel. The reads are performed using elevator seek and load balancing techniques where the workload is distributed in the most efficient manner. Whichever drive is not busy and is positioned closer to the data will be accessed first.

With RAID 1, if one disk drive fails or has errors, the other mirrored disk drive continues to function. This is called Fault Tolerance. Moreover, if a spare disk drive is present, the spare drive will be used as the replacement drive and data will begin to be mirrored to it from the remaining good drive.

The RAID Volume's data capacity equals the smaller disk drive. For example, a 100 GB disk drive and a 120 GB disk drive have a combined capacity of 100 GB in a mirrored RAID Volume.

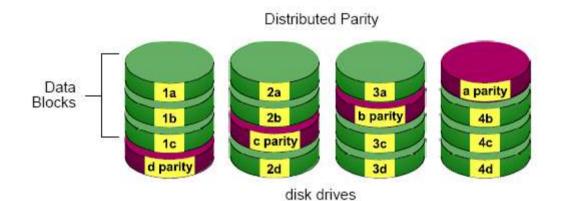

If disk drives of different capacities are used, there will also be unused capacity on the larger drive.

RAID 1 Volumes on this unit consist of two disk drives.

If you want a mirrored RAID Volume with more than two disk drives, see **RAID 10 – Mirror / Stripe** for details.

RAID 5 – Block Striping with Distributed Parity

RAID 5 organizes block data and parity data across the disk drives. Generally, RAID level 5 tends to exhibit lower random write performance due to the heavy workload of parity recalculation for each I/O. RAID 5 works well for file, database, application and web servers.

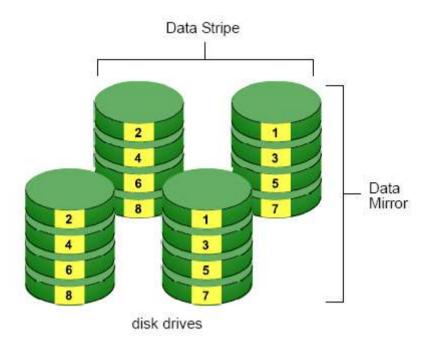

The capacity of a RAID 5 Volume equals the smallest disk drive times the number of disk drives, minus one. Hence, a RAID 5 Volume with four 100 GB disk drives will have a capacity of 300 GB. A RAID Volume with two 120 GB disk drives and one 100 GB disk drive will have a capacity of 200 GB.

RAID 5 is generally considered to be the most versatile RAID level.

RAID 5 requires a minimum of three disk drives.

RAID 10 - Mirror / Stripe

Mirror/Stripe combines both of the RAID 0 and RAID 1 types. RAID 10 can increase performance by reading and writing data in parallel while protecting data with duplication. At least four disk drives are needed for RAID 10 to be installed. With a four-disk-drive RAID Volume, one drive pair is mirrored together then striped over a second drive pair.

The data capacity RAID 10 Volume equals the capacity of the smallest disk drive times the number of disk drives, divided by two.

In some cases, RAID 10 offers double fault tolerance, depending on which disk drives fail.

RAID 10 Volumes on this unit consist of four disk drives.

Because all of the available disk drives are used for the RAID Volume, you cannot set up a spare drive with RAID 10.

Choosing a RAID Level

There are several issues to consider when choosing the RAID level. The following summarizes some advantages, disadvantages and applications for each choice.

• RAID 0

Advantage	Disadvantage
 Implements a striped disk RAID Volume, the data is broken down into blocks and each block is written to a separate disk drive I/O performance is greatly 	 Not a true RAID because it is not fault tolerant The failure of just one drive will result in all data in a RAID Volume

improved by spreading the I/O	being lost
load across many channels and	• Should not be used in mission
drives	critical environments
• No parity calculation overhead is	
involved	

• RAID 1

	Advantage		Disadvantage
•	Simplest RAID storage subsystem design	•	Very high disk overhead - uses only 50% of total capacity
•	Can increase read performance by		
	processing data requests in		
	parallel since the same data		
	resides on two different drives		

• RAID 5

	Advantage	Disadvantage
•	High Read data transaction rate	• Disk failure has a medium impact
•	Medium Write data transaction	on throughput
	rate	
•	Good aggregate transfer rate	
•	Most versatile RAID level	

• **RAID 10**

Advantage	Disadvantage
• Implemented as a mirrored RAID	 Very high disk overhead – uses
• Volume whose segments are RAID	only 50% of total capacity
0 RAID Volumes	
High I/O rates are achieved	
thanks to multiple stripe	
segments	

Appendix – Camera Integration

Camera Support List

Any information about camera integration, including camera model and its spec, please refer to NUUO website:

http://www.nuuo.com/product.php?id=13

Add: C Block, 18 Sihyuan St. Jhongjheng District, Taiwan (ROC) TEL: +886-2-2362-2260 http://www.nuuo.com/ehelpdesk.php
